**2. A portion of our revenues are generated from exports. Any adverse changes in the conditions affecting these exports and our inability to grow our business in new geographic markets may adversely impact our business, results of operations, profitability and margins, cash flows and financial condition.**

Details of our revenue from operations for sale of products in the domestic and export markets for the financial years indicated are set out below:

(Rs. in Lakhs)

Particular	Fiscal 2025	Fiscal 2024	Fiscal 2023
Revenue from operations	11,369.15	7,393.48	8,414.63
Export Sale of products	1,354.12	801.62	2,031.87
As a percentage of revenue from operations (in %)	11.91	10.80	24.15

*Note: Revenue from operations represents total sale of products excluding other operating income.*

For country wise revenue break up kindly refer to the chapter titled “Our Business” beginning on page 159.

The observed decrease in export revenue, which can primarily be attributed to aggressive pricing strategies adopted by Chinese competitors for products similar to ours. China's exporters have significantly reduced their prices in the global market, creating intense price competition. This has impacted the demand for our products and resulted in a decline in our export volumes. Additionally, the aggressive pricing has exerted pressure on our profit margins, as maintaining competitiveness in such an environment has necessitated price adjustments for our offerings.

A significant portion of our revenues is derived from exports majorly Gulf Cooperation Council (GCC) countries. Geopolitical tensions, war-like situations, trade restrictions, or adverse changes in diplomatic relations between India and these nations could severely impact our export operations.

Over-reliance on a specific geographical region for exports increases vulnerability to external factors beyond the Company’s control. To reduce this dependency, we are diversifying our customer base across other international markets. Additionally, we are building a buffer inventory and maintaining flexible logistics arrangements to adapt to potential disruptions.

Accordingly, we may face additional risks with establishing and conducting operations in new geographic locations, including:

- Compliance with a range of laws, regulations and practices, including uncertainties associated with government actions, change in laws, regulations and practices and their interpretations;
- Uncertainties in relation to any new local distribution network;
- Increased advertising and brand building expenditure; and
- Political, economic and social instability.

Competing successfully in international markets may require additional resources due to the unique aspects of each geographic market. Some of our competitors in such markets may have greater resources which may make their products more competitive than ours. We cannot assure you that we will be able to grow our business in such new geographic markets. The risk involved in entering new markets and expanding operations may be higher than expected, and we may face significant competition in such markets. We have limited or no experience in such

markets. Our inability to grow our business in such additional geographic areas could have a material adverse effect on our business, results of operations, profitability and margins, cash flows and financial condition.

3. ***An increase in the cost of raw materials or a shortfall in the availability of raw materials such as Paper Cup Board, Craft Paper, Granules for PE and PLA coating, Ink and Food Grade Chemicals – OGR, OTR and MTR from our suppliers due to various reasons could have a material adverse effect on our business, results of operations, cash flows and financial condition as we may not be able to pass on such costs to our customers.***

We primarily depend on third party suppliers for the supply of reasonably priced and quality raw materials such as Paper Cup Board, Craft Paper, Granules for PE and PLA coating, Ink and Food Grade Chemicals – OGR, OTR and MTR in the quantities required by us.

Set out below is the cost of raw materials consumed including as a percentage of our revenue from operations for the financial years indicated.

(Rs. in Lakhs)

Particulars	Fiscal 2025	Fiscal 2024	Fiscal 2023
Cost of raw materials consumed	9,779.80	6,218.82	7,997.89
Revenue from Operations	11,369.15	7,393.48	8,414.63
Cost of raw materials consumed as a % of revenue from operations	86.02	84.11%	95.05%

Our suppliers may be unable to provide us with sufficient quantity of raw materials at a suitable price or within the required time for us to meet the demand for our products we may experience volatility in the cost or availability of raw material such as Paper Cup Board, Craft Paper, Granules for PE and PLA coating, Ink and Food Grade Chemicals – OGR, OTR and MTR. The price and availability of raw materials for our products depend on several factors beyond our control, including overall economic conditions, production levels, market demand and competition for such materials, production and transportation cost, and government policies.

If these suppliers discontinue their relationship with our Company, we may be unable to procure raw materials from alternate sources in a timely fashion and on commercial acceptable terms. Any disruption in the procurement of raw materials could have a material adverse effect on our business, results of operations, cash flows and financial conditions.

Any increase in prices of raw materials could have an impact on our working capital as we would require additional funds to procure the necessary raw materials at the higher prices through internal accruals or additional borrowings. As a result, we may be required to allocate a larger portion of our working capital towards purchasing raw materials to maintain our production levels. This increased in prices towards purchase of raw material can potentially strain our working capital availability.

4. ***We have experienced fire outbreak in our manufacturing facility on May 05, 2023. We regularly work with flammable materials and activities in our operation which can be dangerous and could cause injuries to people or property.***

The nature of our business involves working with highly flammable materials such as paper and chemical coatings, making the risk of fire a critical concern. On May 05, 2023, our manufacturing unit experienced a fire outbreak caused by a short circuit. This tragic incident led to the loss of two workers' lives and also damage to stocks i.e., raw material in the fiscal year 2024. Additionally, a legal case was filed against our Promoter & Managing Director, Mr. Sunil Maheshwari and Factory Manager in connection with this incident, however the matter has since been disposed of by the Civil Judge Class-1 and Chief Judicial Magistrate vide Order dated July 04, 2025.

The combination of paper-based raw materials, operational machinery, and electrical equipment increases the likelihood of fire hazards in manufacturing units. Inadequate safety protocols or equipment can exacerbate such risks.

These accidents can cause personal injury and loss of life or destruction of property and equipment as well as environmental damage. In addition, the loss or shutting down of our facility resulting from any accident in our operations could disrupt our business operations and adversely affect our results of operations, financial condition and reputation. We could also face claims and litigation filed on behalf of persons alleging injury predominantly due to occupational exposure to hazards at our facility. If these claims and lawsuits, individually or in the aggregate, are resolved against us, our business, financial condition, results of operations and cash flows could be adversely affected.

However, our Company has taken the following steps in order to mitigate such risks:

1. Installation of additional water tanks, including underground tanks and terrace tanks, to ensure an adequate water supply for fire fighting purposes.
2. The size of the existing doors has been enlarged to facilitate easy and swift evacuation of workers in the event of an emergency, ensuring enhanced safety and compliance with emergency protocols.
3. The factory infrastructure has been upgraded to include more civil works and iron sheds, replacing materials prone to catching fire, such as plywood walls, PPE materials, and plastic shades.
4. The height of the factory shed has been increased to approximately 35 feet to allow smoke to escape easily, minimizing the risk of suffocation in the event of a fire.
5. The number of fire extinguishers within the factory has been significantly increased to ensure quick and effective response in case of a fire outbreak.

These measures underscore the Company's commitment to worker safety and operational risk management. Further, we remain vigilant and are continuously enhancing safety protocols to ensure a secure working environment.

**5. *Our Company has reported certain negative cash flows from its investing activities and financing activities, details of which are given below. Sustained negative cash flow could impact our growth and business.***

For further information, please refer to the "Cash flow based on Restated Standalone Financial Statements" and "Management's Discussion and Analysis of Results of Operations and Financial Condition — Cash Flows" on pages F-9 and 218 respectively.

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. We cannot assure you that our net cash flows will be positive in the future. If our Company is not able

to generate sufficient cash flows to finance our projects, make new capital expenditure, make new investments or fund other liquidity needs, it may adversely affect our business and result of financial operations.

7. **We derive a significant portion of our revenue from our top 5 & top 10 customers. The loss of one or more such customers, the deterioration of their financial condition or prospects, or a reduction in their demand for our products could adversely affect our business, results of operations, financial condition and cash flows.**

We depend on a limited number of customers, which exposes us to a risk of customer concentration. The table below sets out our revenue from our top 05 customers and top 10 customers, on the basis of revenue contribution, including as a percentage of revenue from operations for the financial years indicated.

(Rs. in Lakhs)

Particulars	Fiscal 2025		Fiscal 2024		Fiscal 2023	
	Amount	%*	Amount	%*	Amount	%*
Top 05 Customers	4,729.08	41.60	3,179.82	43.00	2,742.19	32.59
Top 10 Customers	6,444.98	56.69	4,079.27	55.17	3,595.62	42.73

\*% of Revenue from Operations.

We expect that we will continue to be reliant on our key customers for the foreseeable future. The loss of any of our key customers for any reason (including delay in fulfilling existing orders; adverse changes in the financial condition of our customers, such as possible bankruptcy or liquidation or other financial hardship) could adversely affect our business, results of operations, cash flows and financial condition.

While we are generally not responsible for shortage of products that leave our facility and maintain an insurance policy to cover various risks during the transit of goods, we cannot assure you that our customers will not claim other deficiencies in our products. Our sales from period to period may fluctuate significantly as a result of changes in our customers' vendor preferences or the discontinuation of, or a lack of commercial success of any products of our Company.

Accordingly, if we fail to retain these customers on terms that are commercially reasonable or if there is any significant reduction in the volume of business with such customers, it could materially and adversely affect our business, results of operations, cash flows and financial condition.

8. **Our manufacturing capacity may not reach their installed capacity and we may also be unable to effectively utilize our expanded manufacturing capacities.**

As on date of this Prospectus, we have one operational manufacturing facility located in Dewas at Madhya Pradesh which has two Plants/Units (E-1 and E-2) with a total installed capacity of 15,000 MTPA as of March 31, 2025.

The table below sets forth details of the installed capacity and capacity utilization at our Facility.

Sr. No.	Year	Manufacturing Unit Location	Area covered by the facility (in Sq. Ft.)	Products	Installed Production Capacity per annum (MT)	Capacity Utilization (MT)	Capacity Utilization (in %)

3.	March 31, 2023			9,000	7,946.79	88.30

As per the certificate issued by N. K. Maheshwari, Chartered Engineer; by way of their certificate dated June 10, 2025.

For further details in relation to our manufacturing/infrastructure facility, please refer to the chapter titled as “Our Business” beginning on page 139.

Our profitability depends on our ability to maintain sufficient levels of capacity utilization. Capacity utilization is affected by our product mix, our ability to accurately forecast customer demand, to carry out uninterrupted operations, industry/ market conditions as well as overhead costs and manufacturing costs. In the event that there is a decline in the demand for our products, or if we face prolonged disruptions at our manufacturing facility including due to interruptions in the supply of water, electricity or as a result of labour unrest, or are unable to procure sufficient raw materials, we would not be able to achieve full capacity utilization of our manufacturing facility, resulting in operational inefficiencies which could have a material adverse effect on our business, results of operations, profitability and margins, cash flows and financial condition.

**9. Our business is largely concentrated in two states i.e. Madhya Pradesh and Gujarat (“States”) and is affected by various factors associated with these states.**

Our existing Units are located at Plot E-1 & E-2, Industrial Area No.- 1, A.B. Road, Dewas, Madhya Pradesh-455001, India, which is strategically located for the procurement of raw materials and to reduce transportation cost. This proximity enables ease of logistics, power, water supply and raw materials for our operations in Unit I.

Geographical revenue distribution from these two states for preceding three financial years are as under:

(Rs. in Lakhs)

State	FY 2024-25		FY 2023-24		FY 2022-23	
	Amount	%*	Amount	%*	Amount	%*
Madhya Pradesh	6,986.28	61.45	5,196.55	70.29	4,150.84	49.33
Gujarat	2,383.97	20.97	568.75	7.69	834.03	9.91
<b>Total</b>	<b>9,370.25</b>	<b>82.42</b>	<b>5,765.30</b>	<b>77.98</b>	<b>4,984.87</b>	<b>59.24</b>

\* % of total revenue from operations.

This concentration of our business in these states are subjects us to various risks, including but not limited to:

- regional slowdown in manufacturing activities;
- vulnerability to change of policies, laws and regulations or the political and economic environment of States;
- constraint on our ability to diversify across states;
- Export disruptions due to geopolitical tensions, trade disputes, sanctions or changes in diplomatic relations between nations;
- Exchange rate volatility impacting profitability.

Any such adverse development affecting continuing operations at our manufacturing facility could result in significant loss due to an inability to meet customer contracts and production schedules, which could materially affect our business reputation within the industry. The occurrence of or our inability to effectively respond to, any such events or effectively manage the competition in the region, could have an adverse effect on our business, results of operations, financial condition, cash flows and future business prospects. Further, continuous addition of industries in and around our manufacturing facility without commensurate growth of its infrastructural facility may put pressure on the existing infrastructure therein, which may adversely affect our business.

**10. Our Company procures more than 85% of its total raw material requirements mainly from five suppliers, any dispute with them or any delay/ disruption/ strike/ lock-outs in their business operation could have a material adverse effect on our business, production, sales and financial condition.**

As we procure more than 85% of our raw material requirements mainly from five suppliers, this significant reliance for the supply of raw material exposes us to substantial operational risks. Any disruption in the supply chain, whether due to operational inefficiencies, financial difficulties, regulatory issues, or other unforeseen circumstances, could severely impact our ability to maintain consistent production levels increased lead times, and potential revenue loss due to our inability to meet customer demand.

Furthermore, our limited sourcing options may leave us vulnerable to price volatility in raw material markets and fluctuations in pricing policies or terms set between the parties.

A brief bifurcation of purchases made by our Company for the financial years 2024-25, 2023-24 and 2022-23 is as follows:

(Rs. in Lakhs)

Particulars	March 31, 2025	March 31, 2024	March 31, 2023
Total Purchases	9,871.66	6,064.07	7,684.05
Purchase from Top 05 Suppliers	8,668.30	5,491.27	6,626.40
Purchase from Top 05 Suppliers in % of Total Purchases	87.81	90.55	86.25
Purchases from other suppliers	1,203.36	572.80	1,057.65
Purchases from other suppliers in % of Total Purchases	12.19	9.45	13.76

Though, we rely significantly on our top five suppliers for raw materials, *out of which two of our major suppliers being our group entities namely, Food Pack Industries Private Limited and Maheshwari Disposal, which accounts for approximately 60% (annually) of our total purchases.* This strong association mitigates the challenges of procuring raw materials.

A brief bifurcation of purchases made by our Company from its group entities, Food Pack Industries Private Limited and Maheshwari Disposal for the financial year 2024-25, 2023-24 and 2022-23 is as follows:

(Rs. in Lakhs)

Particulars	March 31, 2025	March 31, 2024	March 31, 2023
Total Purchases	9,871.66	6,064.07	7,684.05
Purchase from Food Pack Industries Private Limited	5,111.95	2,150.36	2,036.82
Purchase from Food Pack Industries Private Limited in % of Total Purchases (A)	51.78	35.46	26.51
Purchases from Maheshwari Disposal	982.19	924.44	488.46
Purchase from Maheshwari Disposal in % of Total Purchases (B)	9.95	15.24	6.36
<b>Total A+B (in %)</b>	<b>61.73</b>	<b>50.70</b>	<b>32.87</b>

*On the basis of certificate dated June 12, 2025 issued by M/s. S R A M & Co., Statutory Auditors vide UDIN number: 25076979BMHUCW8976, all the above transactions have been executed on arm's length basis.*

We usually buy the raw material i.e. paper from the above group entities to secure ourselves from price fluctuations in paper industry. The uncertainty associated with our reliance on informal supply arrangements may pose a material risk to our operational continuity and financial performance.

There are only a few paper manufacturing companies in India, and for the specific grade of paper we use, the options are even more limited. Additionally, these paper companies sell through distributors, each with a fixed quantity quota. For example, we purchase from a distributor of one paper manufacturing company, and other manufacturers will not supply to us. Since, we have expanded over the past two years, our paper requirements

have increased. As a result, we have started utilizing our group companies to procure paper from other manufacturers.

Further, we have not experienced any disruption in supply with any of our key suppliers in the past, for further information in respect of the top 10 suppliers of raw material for the fiscals 2025, 2024 and 2023, kindly refer to the chapter titled as *“Our Business”* beginning on page 156.

**11. We may not be able to protect our “Proprietary Technology” and prevent the unauthorised use, which could harm our business.**

We rely on proprietary technology; however, no patent has been applied to protect this technology. We may in the future become party to additional, intellectual property infringement proceedings. Companies, including our competitors, or individuals, may hold or obtain patents, trademarks or other proprietary or intellectual property rights that would prevent, limit or interfere with our ability to make, use, develop, sell, or market our products, which could make it more difficult for us to operate our business.

While we have not been subject to any intellectual property claims and are not aware of any unauthorised use of our intellectual property by third parties in the past three Fiscals, monitoring unauthorised use of our intellectual property is difficult and costly, and we cannot assure you that the steps we have taken or will take will prevent misappropriation of our intellectual property. From time to time, we may have to resort to litigation to enforce our intellectual property rights, which could result in substantial costs and diversion of our resources.

Such incidents could erode our competitive advantage, adversely affect our market position, and result in potential financial and reputational losses. Additionally, our inability to secure patent protection may hinder our ability to defend our technology against infringement claims, impacting our business operations and growth prospects.

Kindly refer to our “Competitive Strengths - Advanced Technology Machineries” in the chapter titled “Our Business” beginning on page 151.

**12. A portion of our revenues and expenses are denominated in foreign currencies. As a result, we are exposed to foreign currency exchange risks and regulatory changes in foreign exchange management which may adversely impact our results of operations.**

Apart from our operations in India of which our sales are denominated in Indian Rupees, we also sell our Products in other countries and receive payments in foreign currencies. Fluctuation in foreign currencies exchange rates could have adverse effects on our business, results of operations and financial condition.

Details of export are as under:

(Rs. in Lakhs)

Particulars	March 31, 2025	March 31, 2024	March 31, 2023
Total Revenue from Operations	11,369.15	7,393.48	8,414.63
Export Sale	1,354.12	801.62	2,031.87
Export as % of total revenue from operations	11.91%	10.84%	24.15%

For the details in respect of exports, kindly refer “Our Strategies: Presence in International market” in the chapter titled “Our Business” beginning on page 159.

Export destination countries may also enter into free trade agreements or regional trade agreements with countries other than India. Such agreements and alteration of existing tax treaties may lead to increased competition or may even place us at a competitive disadvantage compared to manufacturers in other countries. India is also a party to, and is currently negotiating, free trade agreements with several countries including the United Kingdom and if we

export our products to such countries, any revocation or alteration of current or future bilateral agreements may also adversely affect our ability to export. Occurrence of any of these events may adversely affect our business, financial condition and results of operations. Further, changes in import policies or an economic slowdown in countries to which we export our products may have a significant adverse impact on our business, financial condition and results of operations. Further, the GoI notifies policies providing fiscal benefits on exports and imports from time to time and any discontinuance or non-availability of such fiscal benefits enjoyed by us or our inability to comply with related requirements may have an adverse effect on our business and results of operations.

Any change in the rates and/or the scheme structure announced by GoI can have material adverse effect on our results of operation or financial condition. We cannot assure you that we will successfully obtain such a license every time and/or will subsequently be able to comply with the requirements prescribed thereunder.

**13. *Company has lodged the Insurance claim in past. Our insurance coverage may not be adequate to protect us against all material risks.***

During the FY 2023-24, Company has lodged the Insurance claim of Rs. 659.39 lakhs which is pending for realization as on the date of filing of this Prospectus.

The nature of our business involves working with highly flammable materials such as paper and chemical coatings, making the risk of fire a critical concern. On May 05, 2023, our manufacturing unit experienced a fire outbreak caused by a short circuit. This tragic incident led to the loss of two workers' lives and also damage to stocks i.e., raw material in the fiscal year 2024. Additionally, a legal case was filed against our Promoter & Managing Director, Mr. Sunil Maheshwari and Factory Manager in connection with this incident, however, the matter has since been disposed of by the Civil Judge Class-1 and Chief Judicial Magistrate *vide* Order dated July 04, 2025.

Our principal type of insurance coverage includes amongst others, vehicle insurance, industrial all risk policy and group personal accident policy.

We cannot assure you that any claim under the insurance policies maintained by us will be honoured fully, in part or on time, or that we have taken out sufficient insurance to cover all our losses. In addition, our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, at an acceptable cost, or at all.

To the extent that we suffer loss or damage, or successful assertion of one or more large claims against us for events for which we are not insured, or for which we did not obtain or maintain insurance, or which is not covered by insurance, exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our business, results of operations, cash flows and financial condition could be adversely affected. Also refer to the chapter titled “Our Business—Insurance” beginning on page 164.

**14. *Our business is working capital intensive. If we experience insufficient cash flows to meet required payments on our working capital requirements, there may be an adverse effect on the results of our operations.***

Our Company proposes to utilize Rs. 2,000.00 lakhs of the Net Proceeds for our estimated working capital requirements. We will utilize Rs. 2,000.00 lakhs in Fiscal 2026. The balance portion of working capital requirements, if any, shall be met from the working capital facilities availed/ to be availed and internal accruals. For details, please refer to the chapter titled “Objects of the Issue” beginning on page 88.

We require a significant amount towards working capital requirements which is based on certain assumptions, and accordingly, any change of such assumptions would result in changes to our working capital requirements. A significant amount of working capital is required to finance the purchase of raw materials and trade receivables.

As a result, we may continue to avail debt in the future to satisfy our working capital requirements. Our working capital requirements may increase if we undertake larger or additional order from our customers or if payment terms do not include advance payments or such contracts have payment schedules that shift payments toward the end of a project or otherwise increase our working capital burden.

**15. Our existing Manufacturing Facility and Registered Office are located in Madhya Pradesh and any adverse changes in the conditions affecting the region can adversely impact our business, results of operations, profitability and margins, cash flows and financial condition.**

As on the date of this Prospectus, we have one operational manufacturing facility, which is located in Dewas, Madhya Pradesh. Our Registered Office is also located in Madhya Pradesh.

Purpose	Area (in Sq. Ft.)	Address
Registered Office & Manufacturing Unit-1	33,745	<b>Aaradhya Disposal Industries Limited</b> Plot E-1, Industrial Area No.- 1, A.B. Road, Dewas, Madhya Pradesh-455001, India.
Manufacturing Unit-2	18,406	<b>Aaradhya Disposal Industries Limited</b> Plot E-2, Industrial Area No.- 1, A.B. Road, Dewas, Madhya Pradesh-455001, India.

Our success depends on our ability to successfully manufacture and deliver our products to meet our customer demand. Our manufacturing facility is susceptible to damage or interruption or operating risks, such as human error, power loss, breakdown or failure of equipment, power supply or processes, obsolescence, terrorist attacks, earthquakes, other natural disasters and industrial accidents and similar events. Which impact our ability to operate our manufacturing facility at optimum utilizations.

The concentration of all of our operations in Madhya Pradesh heightens our exposure to adverse developments related to regulation, as well as political or economic, demographic and other changes in Madhya Pradesh as well as the occurrence of natural and man-made disasters, which may adversely affect business, financial condition

and results of operations. Our manufacturing operations require significant labour and are also reliant on government policies in terms of taxes, duties and incentives made applicable by the state government. As a result, any unfavourable policies of the state government or local government in this region, could adversely affect our business, financial condition and results of operations.

While we have not experienced any major disruptions at our operations due to adverse developments in Madhya Pradesh in the last three Fiscals, we cannot assure you that there will not be any such disruptions in the future.

**16. There have been instances of delays of certain forms which were required to be filed as per the reporting requirements under the Companies Act, 2013 to the Registrar of Companies.**

In the past, there have been certain instances of delays in filing statutory forms under the Companies Act, 1956/2013 with the RoC, which have been subsequently filed on payment of additional fees as per law. Further, the company has filed all the forms which were pending for filing, the delay in filing these forms was not intentional and was primarily due to a lack of understanding of the relevant laws and regulations. Additionally, technical issues experienced on the MCA's V3 portal contributed to the delay in filing certain forms.

**Following are the list of delays in filing of ROC Forms for the current financial year and preceding 3 financial years\*:**

- 17. There have been certain instances of delays in payment of certain statutory dues by us. Any further delays in payment of statutory dues may attract financial penalties from the respective government authorities and in turn may have a material adverse impact on our financial condition and cash flows.**

During the preceding three Financial Years, we have had instances of delays in the payment of certain statutory dues with respect employee provident fund contributions, which have all been paid as on the date of this Prospectus. The table below sets forth the details of the statutory dues paid by us in relation to our employees for the periods indicated:

3.	May, 2022	15/06/2022	18/06/2022	03

These delays were primarily due to the administrative and technical errors. We have since taken steps such as channelling more resources towards improving our administrative systems and training our staff to rectify such delays. However, there can be no assurance that such delays may not arise in the future. This may lead to financial penalties from respective government authorities. While we have been required to make payment of fines/penalties for delays in payment of such statutory dues, wherever applicable, these have not been material in nature. However, we cannot assure you that we will not be subject to such penalties and fines in the future which may have a material adverse impact on our financial condition and cash flows.

**18. *We are required to obtain, renew or maintain statutory and regulatory permits, licenses and approvals to operate our business, and we may experience delays in obtaining, renewing or maintaining such licenses or permits or be unable to obtain such licenses and approvals.***

Our manufacturing activities are subject to government regulation, and we are required to obtain a number of statutory and regulatory permits and approvals under central and state government rules in the geographies in which we operate. Some of the permits and approvals for our manufacturing facility are valid only for a definite period of time and require renewal. If we do not receive such approvals or are not able to renew the approvals in a timely manner, our business and operations may be adversely affected.

For further information on the nature of approvals and licenses required for our business and for information on the material approvals applied for, please refer to the chapter titled “*Government and Other Statutory Approvals*” beginning on page 247. A majority of these approvals, including, inter alia, the consent to operate under the environmental laws, are granted for a limited duration and require renewal from time to time. These approvals, licenses, registrations and permissions may be subject to numerous conditions. If we fail to obtain some or all of these approvals or licenses, or renewals thereof, in a timely manner or at all, or if we fail to comply with applicable conditions or it is claimed that we have breached any such conditions, our license or permission for carrying on a particular activity may be suspended or cancelled and we may not be able to carry on such activity, which could adversely affect our business, results of operations, cash flows and financial condition. Any inability on our part to adequately detect and rectify any defects in our internal controls and compliance systems which in turn assist in ensuring compliance with regulatory or statutory requirements, may impact our ability to accurately comply and obtain necessary consents and approvals. While there has been no instance where we failed to obtain regulatory approvals in the last three Fiscals which had an adverse impact our operations, we cannot assure you that such instance will not arise in the future.

Further, while there has been no instance in the last three Fiscals where our license was suspended or cancelled by any regulatory authority which impacted our operations, we cannot assure you that such instance will not arise in the future.

**19. *Our existing manufacturing facility is subject to operating risks. The unexpected shutdown or slowdown of operations at our manufacturing facility could have a material adverse effect on our business, results of operations, cash flows and financial condition.***

Our manufacturing facility is subject to operating risks, such as the breakdown or failure of equipment, power supply or processes, performance below expected levels of efficiency, obsolescence, labour disputes, natural disasters, industrial accidents and the need to comply with the directives of relevant government authorities, failure of a supplier to provide us with the raw materials. While we undertake precautions to minimize the risk of any significant operational problems at our plants, there can be no assurance that our business, results of operations, cash flows and financial condition will not be adversely affected by disruption caused by operational problems at our manufacturing facility. Any unscheduled, unplanned or prolonged disruption of our manufacturing operations, including, power failure, fire and unexpected mechanical failure of equipment, performance below expected levels of output or efficiency, obsolescence, labour disputes, strikes, lock-outs, earthquakes and other natural disasters, industrial accidents, any significant social, political or economic disturbances, could reduce our ability to meet the conditions of our contracts and adversely affect sales and revenues from operations in such period. The occurrence of any of these risks could affect our operations by causing production to shut down or slowdown. No assurance can be given that one or more of the factors mentioned above will not occur, which could have a material adverse effect on our results of operations and financial condition.

Any interruption in production may require significant and unanticipated capital expenditure to affect repairs or increase the cost, which could have a negative effect on profitability and cash flows. Any or all of these occurrences could result in the temporary or long-term closure of our manufacturing units, severely disrupt our business operations and materially adversely affect our business, results of operations, cash flows and financial condition. While we have not experienced any major disruptions at our manufacturing facility in the last three Fiscals, we cannot assure you that there will not be any such disruptions in the future.

- 20. We do not own our Registered Office and Manufacturing Facility. Any revocation or adverse changes in the terms of the lease and license/ lease may have an adverse effect on our business, prospects, results of operations and financial condition.**

Our Registered Office and Manufacturing Facility operate entirely on leased premises, we have entered into a lease agreement with the Government of Madhya Pradesh in respect of our Registered Office and Manufacturing Facility.

Details of immovable properties are given herein below:

Sr. No.	Owner	Address	Owned/ Leased	Date of Agreement	Purpose
1.	Governor of Madhya, acting through General Manager, District Trade and Industries Centre, Dewas.	Plot E-1, Industrial Area No.- 1, A.B. Road, Dewas, Madhya Pradesh-455001, India.	Leased	May 12, 2014 to May 11, 2044	Registered Office and Manufacturing Unit-1
2.	Governor of Madhya, acting through General Manager, District Trade and Industries Centre, Dewas.	Plot E-2, Industrial Area No.- 1, A.B. Road, Dewas, Madhya Pradesh-455001, India.	Leased	June 15, 2018 to June 14, 2048	Manufacturing Unit-2

Any disruption, termination, or adverse re-negotiation of lease agreements could have a material impact on our manufacturing processes, supply chain operations, and overall business continuity, which could have a material adverse effect on our business, prospects, results of operations and financial condition.

For further details, please refer to the chapter titled “Our Business” beginning on page 161.

- 21. We do not have any long-term agreements with our key suppliers for the continuous supply of raw materials. Absence of such agreements leaves us vulnerable to sudden disruptions in supply, potential price increases, or unfavourable adjustments to supply terms, all of which could adversely affect our production schedules and financial stability.**

We do not have any long-term agreements or contracts in place with any of our suppliers that mandate the continuous supply of raw materials. The absence of binding contracts means that our supply arrangements are subject to change at the discretion of the suppliers, potentially without notice. This lack of contractual obligation exposes us to the risk of sudden supply disruptions, price increases, or unfavourable changes in supply terms, which could negatively impact our production schedules and financial stability. In the event that any key supplier decides to discontinue or reduce the supply of raw materials, or if we are unable to secure alternative suppliers on similar terms, our business operations could be significantly compromised. The uncertainty associated with our reliance on informal supply arrangements may pose a material risk to our operational continuity and financial performance.

Further, we have not experienced any disruption in supply with any of our key suppliers in the past, for further information in respect of the top 10 suppliers of raw materials for the fiscals 2025, 2024 and 2023, kindly refer to the chapter titled “Our Business” beginning on page 156-157.

- 22. We do not have long-term agreements with any of our customers, the loss of one or more of them or a reduction in their demand for our products could adversely affect our business, results of operations, financial condition and cash flows.**

We have not entered into long-term agreements with any of our customers. Our relationship with our customers is generally on a non-exclusive basis and accordingly, our customers may choose to cease sourcing our products and choose to source alternative options. Therefore, we cannot assure that we will receive repeat orders from our customers in the future. Additionally, our customers have high and stringent standards for product quantity and quality as well as delivery schedules. Any failure to meet our customers’ expectations and specifications could

result in the cancellation or non-renewal of purchase orders. There are also several factors, other than our performance, that could cause the loss of a customer such as:

- a) increase in prices of raw materials and other input costs;
- b) changes in consumer preferences;
- c) changes in governmental or regulatory policy, etc.

Any of these factors may have an adverse effect on our business, results of operations and financial condition. Further, absence of any contractual exclusivity with respect to our business arrangements with such customers poses a threat on our ability to be able to continue to supply our products to these customers in the future. If we overestimate demand, we may incur costs to purchase more raw materials and manufacture more products than required.

Accordingly, we may face the risk that our customers might not place any order or might place orders of lesser than expected size or may even cancel existing orders or make change in their policies which may result in reduced quantities being manufactured by us. Cancellations, reductions or instructions to delay production (thereby delaying delivery of products manufactured by us) by a significant customer could adversely affect our results of operations by reducing our sales volume, as well as by possibly causing delay in our customers' paying us for the order placed for purchasing the inventory with us which we would have manufactured for them. We may not find any customers or purchasers for the surplus or excess capacity in which case we would be forced to incur a loss.

In addition, we make significant decisions, including determining the levels of business that we will seek and accept, production schedules, personnel requirements and other resource requirements, based on our estimates of customer orders. If we underestimate demand, we may manufacture fewer quantities of products than required, which could result in the loss of business. We may fail to maintain the requisite inventory, which may adversely impact our ability to deliver products to customers in a timely manner which may lead to loss of revenues or customers. Our inability to accurately forecast demand for our products and manages our inventory may have an adverse effect on our business, results of operations and financial condition.

**23. We are subject to strict quality requirements and any product defect issues or failure by us or our raw material suppliers or our customers to comply with quality standards may lead to the cancellation of existing and future orders, recalls or exposure to potential product liability claims.**

We face an inherent business risk of exposure to product defects and subsequent liability claims if the use of any of our products results in personal injury or property damage. We may not be able to meet regulatory quality standards in India or abroad, or the quality standards imposed by our customers, raw material suppliers and applicable to our manufacturing processes, which could have a material adverse effect on our business, financial condition, results of operations and cash flows. We are also required to obtain material approvals and certifications for product quality verification in India and other jurisdictions. We have following certificates in respect of quality requirements:

Sr. No.	Nature of License / Approvals / Ratings	Issuing Authority	Particulars of License / Approvals / Certificate no.	Date of Issue	Date of Renewal	Date of Expiry
1.	ISO 9001: 2015	LMS Assessments Limited	IN240406010	April 06, 2024	June 12, 2025	April 05, 2027
2.	ISO 14001: 2015		IN240406011			
3.	ISO 45001: 2018		IN240406012			
4.	ISO 22000: 2018		IN240406013			
5.	ISO GMP		IN240406014U			

While we have not experienced any instances of defect issues or failure to comply with the quality standards in the past, if any of our products do not meet regulatory standards or are defective, we may be, inter alia, (i) responsible for damages relating to any defective products, (ii) required to replace, recall or redesign such products, (iii) incur significant costs to defend any such claims or (iv) restricted to produce or market such products to our customers.

We typically do not provide a guarantee or warranty against manufacturing defects on our products, which are in line with the standard practice in the industry in which we operate. While there have not been any material product liability claims made against our products or any cancellation of existing or future orders resulting in a material adverse impact on our business, financial condition, results of operations and cash flows, there can be no assurance that this will continue in the future. There can be no assurance that we comply or can continue to comply with all regulatory requirements or the quality requirement standards of our customers. There is no guarantee that any future non-compliance with quality standards will not result in a material adverse effect on our business, financial condition, results of operations, cash flows and prospects.

***24. We have in the past entered into related party transactions and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations.***

We have entered into related party transactions with our Promoters, Promoters Group, Group Entities and Directors. For details of these transactions, please refer “Annexure X - Related Party Transactions” under the section titled “Financial Information” beginning on page F-46. We have taken the permission of Board & shareholders for such transactions under the Companies Act, 2013.

All the related party transactions carried out by the Company in the past are in compliance with the Companies Act, 2013 and other applicable provisions at that time.

Although all related-party transactions that we may enter into are on an arm’s length basis and are subject to approval by our Audit Committee, Board or shareholders, as required under the Companies Act, 2013 and the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended (“SEBI Listing Regulations”), we cannot assure you that such transactions in the future, individually or in aggregate, will not have an adverse effect on our financial condition and results of operations or that we could not have achieved more favourable terms if such transactions had not been entered into with related parties. Such related-party transactions in the future may potentially involve conflicts of interest which may be detrimental to the interest of our Company and we cannot assure you that such transactions, individually or in the aggregate, will always be in the best interests of our minority shareholders and will not have an adverse effect on our business, financial condition, cash flows and results of operations. There can also be no assurance that any dispute that may arise between us and related parties will be resolved in our favour.

We cannot assure you that we will be able to maintain the terms of such transactions, or that, in the event we enter into future transactions with related parties, the terms will be favourable to us.

***25. Our business is dependent on direct sales model. A decrease in the revenue we earn from such key direct customers and an inability to expand or effectively manage our customer could adversely affect our business, results of operations, profitability and margins, cash flows and financial condition.***

Our Company’s direct-to-customer sales approach does not involve dealers or distributors. While this model allows for better control over pricing and customer relationships, it also increases the risk of losing customers or facing difficulties in acquiring new ones. High turnover rates, insufficient training, or lack of motivation among our sales personnel could adversely affect our ability to generate sales and sustain growth.

The absence of intermediaries may lead to gaps in market reach, limited scalability, and higher dependence on internal sales teams. Fluctuation in market demand, competition from alternative sales channel, could impact our sales, which may have a material adverse effect on our cash flows and financial condition.

To address these challenges, we are investing in a robust sales force, strengthening customer relationship management, and leveraging digital marketing strategies to expand our market presence.

**26. *If we do not continue to invest in new technologies and equipment, our technologies and equipment may become obsolete and our cost of processing may increase relative to our competitors, which may have an adverse impact on our business, results of operations and financial condition.***

We believe that going forward, our profitability and competitiveness will depend in large part on our ability to maintain low cost of operations, including our ability to process and supply sufficient quantities of our products as per the agreed specifications. Our dedicated research is focused on adopting state-of-the-art technologies that optimise resource utilization and significantly reduce environmental impact.

If we are unable to respond or adapt to changing trends and standards in technologies and equipment, or otherwise adapt our technologies and equipment to changes in market conditions or requirements, in a timely manner and at a reasonable cost, we may not be able to compete effectively, and our business, financial condition and results of operations may be adversely affected.

**27. *Our inability to collect receivables and default in payment from our customers could result in the reduction of our profits and affect our cash flows.***

We are exposed to counterparty credit risk in the usual course of our business due to the nature of inherent risks involved in, dealings and arrangements with our customers who may delay or fail to make payments or perform other contractual obligations. The majority of our sales are to customers on an open credit basis, with standard payment terms of generally between 70 to 80 days, while we generally monitor the ability of our customers to pay these open credit arrangements and limit the credit, we extend to what we believe is reasonable based on an evaluation of customer’s financial condition and payment history, we may experience losses because of a customer being unable to pay. As a result, while we maintain what we believe to be a reasonable allowance for doubtful receivables for potential credit losses based upon our historical trends and other available information, there is a risk that our estimates may not be accurate.

We have, and may continue to have, high levels of outstanding receivables. As of March 31, 2025, March 31, 2024 and March 31, 2023, our trade receivables were Rs. 2,283.51 Lakhs, Rs. 1,550.78 Lakhs and Rs. 1,608.23 Lakhs, respectively. Set forth below are details relating to holding levels of our trade payables, trade receivables, inventory turnover and working capital cycle, for the periods indicated.

*(in no. of days)*

<b>Particulars</b>	<b>Fiscal 2025</b>	<b>Fiscal 2024</b>	<b>Fiscal 2023</b>
Trade receivables days	73	77	70
Inventory turnover days	73	75	78
Trade payables days	32	35	32
<b>Working capital days</b>	<b>114</b>	<b>117</b>	<b>116</b>

Any increase in our trade receivable turnover days will negatively affect our business. If we are unable to collect customer receivables or if the provisions for doubtful receivables are inadequate, it could adversely affect our business, financial condition and results of operations.

Macroeconomic conditions could also result in financial difficulties, including insolvency or bankruptcy, for our customers, and as a result could cause customers to delay payments to us, request modifications to their payment arrangements, that could increase our receivables or affect our working capital requirements, or default on their payment obligations to us. An increase in bad debts or in defaults by our customer, may compel us to utilize greater amounts of our operating working capital and result in increased interest costs, thereby adversely affecting our business, results of operations, cash flows and financial condition.

AARADHYA DISPOSAL INDUSTRIES LTD

**28. Trade Receivables and Inventories form a substantial part of our current assets. Failure to manage our inventory could have an adverse effect on our business, results of operations, cash flows and financial condition.**

Our business is working capital intensive and hence, Trade Receivables and Inventories form substantial part of our current assets and net worth.

(Rs. in Lakhs)

Particulars	Fiscal 2025	Fiscal 2024	Fiscal 2023
Total Current Assets	5,657.93	4,223.67	3,756.36
Trade Receivables	2,283.51	1,550.78	1,608.23
Trade Receivables % of total Current Assets	40.36%	36.72%	42.81%
Inventories	2,286.81	1,513.78	1,794.65
Inventories % of total Current Assets	40.42%	35.84%	47.78%

The results of operations of our business are dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and manufacture and trade inventory accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory we manufacture, we may be required to write-down our inventory or pay our suppliers without new purchases, or create additional vendor financing, which could have an adverse impact on our business, results of operations, cash flows and financial condition. We estimate our sales based on the forecast, demand and requirements and also on the customer specifications. Natural disasters such as earthquakes, extreme climatic or weather conditions such as floods or droughts may adversely impact the supply of raw material and local transportation. If our supply of raw materials be disrupted, we may not be able to procure an alternate source of supply in time to meet the demands of our customers. In addition, disruptions to the delivery of product to our customers may occur for reasons such as poor handling, transportation bottlenecks, or labour strikes, which could lead to delayed or lost deliveries or damaged products and disrupt supply of these products. To improve our line capability, we try to stock our inventory at our existing manufacturing facility. An optimal level of inventory is important to our business as it allows us to respond to customer demand effectively. If we over-stock inventory, our capital requirements will increase, and we will incur additional financing costs. If we under-stock inventory, our ability to meet customer demand and our operating results may be adversely affected. Any mismatch between our planning and actual consumer consumption could lead to potential excess inventory or out-of-stock situations, either of which could have an adverse effect on our business, results of operations, cash flows and financial condition.

In respect of trade receivables, we promote sales and remain competitive in the market our Company provide credit period to our customers which range from 70 to 80 days depending on the customers. We face competition not only from the domestic players but also from international player, especially from China. Our Company face stiff competition from the Chinese sellers as China provide export subsidy to the manufactures on export. Additionally, our Company faces intense competition from the large number of domestic manufactures of paper cup blanks, food grade papers and other paper products who operate in different regional market and various levels. Our credit policy also dependent on the demand of our products in domestic and international markets which has the bearing on various macro and micro economic factors.

**29. Compliance with, changes in, safety, health and environmental laws and various labour, workplace related laws and regulations, including terms of the approvals granted to us, may increase our compliance costs and as such adversely affect our business, prospects, results of operations and financial condition.**

We are subject to a broad range of safety, health and environmental related laws and regulations in the jurisdictions in which we operate, which impose controls on the disposal and storage of raw materials, noise emissions, air and water discharges; on the storage, handling, discharge and disposal of chemicals, employee exposure to hazardous substances and other aspects of our operations. For example, laws in India limit the amount of hazardous and pollutant discharge that our Manufacturing facility may release into the air and water. The discharge of substances

that are chemical in nature or of other hazardous substances into the air soil or water beyond these limits may cause us to be liable to regulatory bodies and incur costs to remedy the damage caused by such discharges.

Any of the foregoing could subject us to litigations which may increase our expenses in the event we are found liable and could adversely affect our reputation. The adoption of stricter health and safety laws and regulations, stricter interpretations of existing laws, increased governmental enforcement of laws or other developments in the future may require that we make additional capital expenditures, incur additional expenses or take other actions in order to remain compliant and maintain our current operations. Complying with, and changes in, these laws and regulations or terms of approval may increase our compliance costs and adversely affect our business, prospects, results of operations and financial condition.

For licenses, permits and authorization obtained by us, please refer to the chapter titled “*Government and Other Statutory Approvals*” beginning on page 247. There is a risk that we may inadvertently fail to comply with such regulations, which could lead to enforced shutdowns and other sanctions imposed by the relevant authorities, as well as the withholding or delay in receipt of regulatory approvals for our new products.

**30. *Our Independent Directors do not have qualification related to the business of our Company.***

We have three Independent Directors in our Board; all the three Independent Directors have good qualification & experience but not related to our business in paper disposable industries.

Qualifications & Experience of our Independent Directors:

Sr. No.	Name	Qualification & Experience
1.	Mr. Narender Tulsidas Kabra	He holds a Bachelor's degree in Textile Technology, earned in April 1979. With 34 years of experience in Indian banking, particularly at the Bank of Maharashtra (1983–2017), Mr. Kabra has specialized expertise in credit business, credit risk management, information technology and human resource management.
2.	Mr. Dharmendra Pawar	He is a member of the Institute of Company Secretaries of India (ICSI) since 2016, he also holds a Master's degree in Commerce, completed in 2013.
3.	Mr. Siddharth Shankar Mahajan	He is a member of the Institute of Chartered Accountants of India (ICAI). Also, he holds Certificate of Practice since July 2008.

For further details in respect of profile, kindly refer “Brief Biographies of Directors” beginning on page 181.

Accordingly, our business, financial condition, results of operations, cash flows and prospects may be adversely affected by the any negligence accrued in corporate governance due to lack of experience & qualification related to the business of our Company by these Independent Directors.

**31. *Certain experience-related documents of Mr. Narender Tulsidas Kabra, our Independent Director, are not available, which may affect the completeness of our disclosures.***

As on the date of this Prospectus, certain documents evidencing the professional experience of Mr. Narender Tulsidas Kabra, one of our Independent Directors, are not available with the Company. While Mr. Kabra has declared 34 years of experience with the Bank of Maharashtra (1983–2017), his appointment letter from the bank is currently not traceable. However, we are in possession of a promotion letter dated July 1, 2013, reflecting his promotion to the position of General Manager (IT) from Deputy General Manager (Recovery), as well as a relieving letter dated September 29, 2017, issued on his superannuation.

Although these documents provide partial confirmation of his tenure, the absence of complete supporting records may limit our ability to independently verify certain aspects of his declared experience. Any adverse observation or concern raised by regulatory or statutory authorities in this regard may affect our corporate governance standards, and could have an adverse impact on our reputation, compliance status, or stakeholder confidence.

**32. A portion of the Net Proceeds may be utilized for pre-payment of term loans availed by our Company.**

We propose to pre-pay of loans availed by our Company from Banks from the Net Proceeds. The Company has chosen the loans to be prepaid based on commercial considerations. For details, please refer to the chapter titled “Objects of the Issue” beginning on page 88.

This will reduce our outstanding debt and interest obligations, however, there can be no assurance that the pre-payment of such loans from the Net Proceeds contribute to the growth of our business operations or revenue generation. Additionally, the decision to allocate Net Proceeds for loan pre-payment may limit the availability of funds for other strategic initiatives or unforeseen financial requirements.

**33. We own plant & machinery, resulting in increased fixed costs to our Company. In the event we are not able to generate adequate cash flows it may have a material adverse impact on our operations.**

We own plant & machineries, resulting in increased fixed costs of our Company. In the event, we are unable to generate or maintain adequate revenue in a timely manner or at all, it could have a material adverse effect on our financial conditions and operations. The Objects of the Issue have not been appraised by any bank or financial institution. The proposed utilisation of the Net Proceeds is based on current business plan, current conditions and other commercial and technical factors including interest rates and other charges, the financing and other agreements entered into by our Company, which is subject to change in light of changes in external circumstances and other factors beyond our control such as general economic conditions, inflation, technological changes, changing customer preferences and competitive landscape, credit availability and interest rate levels. Our management will have broad discretion to revise our business plans, estimates and budgets from time to time. Consequently, our funding requirements and deployment of funds may change, which may result in rescheduling of the proposed utilisation of the Net Proceeds, subject to compliance with applicable law. A portion of the use of the Net Proceeds involving deployment towards general corporate purposes is at the discretion of the management of our Company. For further information please refer to the chapter titled “*Objects of the Issue*” beginning on page 88.

In case of increase in actual expenses or shortfall in requisite funds, additional funds for a particular activity will be met by any means available to us, including internal accruals and additional equity and/or debt arrangements. If actual utilisation towards the objects of the Issue is lower than the proposed deployment, such balance will be used for future growth opportunities, including funding other existing objects, if required. If estimated utilisation of the Net Proceeds is not completely met in a fiscal year, it shall be carried forward.

Any variation in the objects of the Issue shall be made in compliance with Sections 13(8) and 27 of the Companies Act which requires us to obtain a shareholders’ approval, and SEBI ICDR Regulations which requires us to provide an exit opportunity to shareholders who do not agree with our proposal to change the objects of the issue or vary the terms of such contracts, at a price and manner as prescribed by SEBI and in accordance with any other applicable law. In the event of any such circumstances that require us to undertake variation in the disclosed utilisation of the Net Proceeds, we may not be able to obtain the shareholders’ approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders’ approval may adversely affect our business, results of operations and financial condition.

Further, our Promoters would be required to provide an exit opportunity to shareholders who do not agree with our proposal to change the objects of the Issue or vary the terms of such contracts, at a price and manner as prescribed by SEBI. Additionally, the requirement on Promoters to provide an exit opportunity to such dissenting shareholders may deter the Promoters from agreeing to the variation of the proposed utilisation of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoters or the controlling shareholders of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price prescribed by SEBI.

**35. *We are highly dependent on our Promoters and our Key Managerial Personnel. Any inability on our part to retain or recruit skilled personnel could adversely affect our business, results of operations and financial condition.***

We are highly dependent on our Promoters and Key Managerial Personnel, for setting our strategic business direction and managing our business. Our Promoters have significant experience in the Disposable Paper Industry, have led our business and operations. They play a vital role in providing us strategic guidance and direction. For further details, please refer to the chapters titled “*Our Management*” and “*Our Promoters and Promoter Group*” beginning on pages 179 and 196, respectively. Loss of the services of any of our Promoters and Key Managerial Personnel could adversely affect our business, results of operations, cash flows and financial condition.

Further, our success depends to a large extent upon the continued efforts and services of our Key Managerial Personnel with technical expertise, and we rely significantly on their experience. For further details, please refer to the chapter titled “*Our Management*” beginning on page 179. Our success also depends, in part, on key customer and supplier relationships forged by them and we cannot assure you that we will be able to continue to maintain these customer relationships, or renew them, if we are unable to retain such members of our Key Managerial Personnel, which could adversely affect our business and results of operations.

Our business is manpower intensive and our continued success and ability to meet future business challenges depends on our ability to attract, recruit and retain experienced, talented and skilled professionals. As of June 30, 2025, we had 33 permanent employees. For further details, please refer to the chapter titled “Our Business” beginning on page 164. In the future, we may also be required to increase our levels of compensation more than in the past in order to remain competitive and attract skilled and experienced professionals. Our inability to recruit or train a sufficient number of such personnel or our inability to manage the attrition levels in different employee categories may materially and adversely affect our business, results of operations, cash flows and financial condition.

**36. We have certain contingent liabilities and commitments which, if materialised, may adversely affect our financial condition.**

We have certain contingent liabilities and commitments which, if materialised, may adversely affect our financial condition. Set forth below are details of our contingent liabilities and commitments as at March 31, 2025, March 31, 2024 and March 31, 2023:

(Rs. in Lakhs)

Particulars	Fiscal 2025	Fiscal 2024	Fiscal 2023

\*As on the date of this Prospectus, the guarantees given by the Company has been removed vide letter dated August 01, 2025 issued by Axis Bank Limited to group companies/ entities i.e., Food Pack Industries Private Limited and Aaradhya Paper & Packaging Industries Private Limited with modified terms of Sanction Letters.

For further details, please refer “Annexure AA” of Restated Standalone Financial Statements on page F-50.

Any or all of the abovementioned contingent liabilities may crystallise and become actual liabilities. In the event that any of our contingent liabilities become non-contingent, business, results of operations, cash flows and financial condition may be adversely affected. Furthermore, there can be no assurance that we will not incur similar or increased levels of contingent liabilities in the current financial year or in the future.

**37. We are subject to risks arising from interest rate fluctuations, which could reduce our profitability and adversely affect our business, results of operations, cash flows and financial condition.**

Our operations are partly funded by debt and increases in interest rate and a consequent increase in the cost of servicing such debt may adversely affect our business, results of operations, cash flows and financial condition. Interest rates for borrowings have been volatile in India in recent periods. Changes in prevailing interest rates affect our interest expense in respect of our borrowings, and may have an adverse effect on our business, results of operations, cash flows and financial condition.

The table below sets out our interest expenses, including as a percentage of total expenses for the preceding three financial years:

(Rs. in Lakhs)

Particulars	Fiscal 2025	Fiscal 2024	Fiscal 2023
Interest Expenses	275.68	165.04	169.37
Total Expenses	10,106.52	6,969.86	8,391.52
Interest Expense in % of Total Expenses	2.73%	2.37%	2.02%

For a description of interest typically payable under our financing agreements, please refer to the chapter titled “Financial Indebtedness” beginning on page 208.

Although we may in the future engage in interest rate hedging transactions or exercise any right available to us under our financing arrangements to terminate the existing debt financing arrangement on the respective reset dates and enter into new financing arrangements, there can be no assurance that we will be able to do so on commercially reasonable terms or that these agreements, if entered into, will protect us adequately against interest rate risks. Further, if such arrangements do not protect us adequately against interest rate risks, they would result in higher costs.

**38. *We are heavily dependent on machinery for our operations and any disruption to the same may cause interruption in business.***

Our existing manufacturing facility are dependent on plant and machinery. They require periodic maintenance checks and technical support in an event of technical breakdown or malfunctioning. Any significant malfunction or breakdown of our machineries may entail significant repair and maintenance costs and cause delays in our operations. While our Company has not entered into any technical support service agreements for our machineries which are repaired, our Company has its own in-house maintenance team to service/ repair the machinery. Any failure to quickly redress any technical issue may increase our downtime which may affect our business, results of operations and financial condition. Further, while we maintain necessary supplies of spare parts and maintenance related equipment, if we are unable to procure the necessary spare parts in a timely manner, or if we are unable to repair the malfunctioning machinery promptly, our manufacturing operations may be hampered, which could have an adverse impact on our business, results of operations and financial condition.

**39. *Some of our Certificates, Registrations and Licences are in erstwhile name.***

Some of our certificates, licenses, registrations, or other relevant documents such as Factory License, Udyam Registration and Consent Order under Pollution Control Acts are presently under its former name i.e. Aaradhya Disposal Industries Private Limited. However, our Company has not filed the application to effectuate the registration of these documents under its updated name.

For details, kindly refer to the chapter titled “*Government and Other Statutory Approvals*” beginning on page 247.

**40. *Certain Group Entities Operate in Related Business Segments.***

Our Company, along with certain Group Companies/Entities such as Aaradhya Paper & Packaging Industries Private Limited, Food Pack Industries Private Limited, Maheshwari Disposal (Proprietorship), and Sri Kriscon Industries (Proprietorship), are engaged in related segments within the paper-based industry. While each entity functions independently with its own operational focus, there may be instances in the future where certain business areas, customer segments, or vendor networks overlap.

To date, our Company has not encountered any material conflict or business disruption due to such overlaps. We believe that our current operating structure, coupled with a clear business strategy, provides sufficient distinction in scope and operations. Nevertheless, as a prudent measure, we remain committed to adopting appropriate internal procedures and governance mechanisms, in line with applicable laws and best practices, to address any such matters should they arise in the future.

**41. *Our Promoters, certain of our Directors, Key Managerial Personnel may have interests in us other than reimbursement of expenses incurred and normal remuneration or benefits.***

Our Promoters, Directors, Key Managerial Personnel may be deemed to be interested to the extent of Equity Shares held by them and by members of our Promoter Group, as well as to the extent of any dividends, bonuses, perquisites or other distributions on such Equity Shares. For further details, please refer to the chapter titled “*Capital Structure*”, “*Our Promoters and Promoter Group*” and “*Our Management*” beginning on pages 73, 196 and 179 respectively.

- 42. Industry information included in this Prospectus has been derived from the Disposable Paper Cups/Glasses Cup Stock and Food grade Paper Market India Report (“D&B Report”, which was prepared by Dun & Bradstreet (“Dun & Bradstreet”) and exclusively commissioned and paid for by our Company for the purposes of the Issue, and any reliance on information from the Report for making an investment decision in the Issue is subject to inherent risks.**

Certain sections of this Prospectus include information that is based on or derived from the Disposable Paper Cups/Glasses Cup Stock and Food grade Paper Market India Report, which was prepared by Dun & Bradstreet (“Dun & Bradstreet”) and exclusively commissioned and paid for by our Company for the purposes of the Issue pursuant to an engagement letter dated October 11, 2024. Dun & Bradstreet is not related to our Company, its Group Entities, our Promoters, our Directors and the Book Running Lead Manager.

The D&B Report is subject to various limitations and based upon certain assumptions that are subjective in nature. Statements in the D&B Report that involve estimates are subject to change, and actual amounts may differ materially from those included therein. The D&B Report uses certain selected methodologies for market sizing and forecasting and, accordingly, investors should read the industry related disclosure in this Prospectus in this context. The D&B Report is not a recommendation to invest / disinvest in any company covered in the D&B Report. Accordingly, prospective investors should not place undue reliance on, or base their investment decision solely on this information.

In view of the foregoing, you should consult your own advisors and undertake an independent assessment of information in this Prospectus based on, or derived from, the D&B Report before making any investment decision regarding the Issue. Also, please refer to the chapter titled “Certain Conventions, Use of Financial Information and Market Data and Currency of Presentation—Industry and Market Data” and “Our Industry” beginning on pages 15 and 112, respectively.

- 43. We have unsecured loans that may be recalled by the lenders at any time and we may not have adequate funds to make timely payments or at all.**

Our Company has availed unsecured loans from certain individuals/ entities which may be recalled by such individuals/ entities at any time. As of March 31, 2025, such loans availed by us amounted to Rs. 319.52 Lakhs. While, as on date, neither the loan arrangement has been terminated nor the outstanding amounts have been called to be repaid, there can be no assurance that such parties will not recall the outstanding amount (in part, or in full) at any time. In the event that the lenders seek repayment of such unsecured loans, our Company would need to find alternative sources of financing which may not be available on commercially reasonable terms. Any failure to service such indebtedness, or discharging any obligations thereunder could have a material adverse effect on our cash flows and financial condition. For further details, please refer to the chapter titled “Financial Indebtedness” beginning on page 208.

#### **External Risk Factors:**

- 44. Our business and financial performance may be adversely affected by downturns in the target markets that we serve or reduced demand for the types of products we sell.**

Demand for our products is often affected by general economic conditions as well as product-use trends in our target markets. These changes may result in decreased demand for our products. For example, our specialty products business usually declines during periods of economic slowdowns. There may be periods during which demand for our products is insufficient to enable us to operate our production facility in an economical manner. The occurrence of these conditions is beyond our ability to control and, when they occur, they may have a significant impact on our sales and results of operations.

- 45. Wage increases in India may reduce our profit margins and negatively impact our financial condition and results of operations.**

We are dependent upon availability of skilled and semi-skilled labour. Wages and other compensation paid to our employees is one of our significant operating costs, and an increase in the wages or employee benefit costs will significantly increase our operating costs. Because of rapid economic growth in India and increased competition

for skilled and semi-skilled employees in India, wages for comparable employees in India are increasing at a fast rate. We may need to increase the levels of employee compensation more rapidly than in the past to remain competitive in attracting and retaining the quality and number of skilled and semi-skilled employees that our business requires. Further, many of our employees receive salaries that are linked to minimum wage laws in India and any increase in the minimum wage in any state in which we operate could significantly increase our operating costs. In addition, a shortage in the labour pool or other general inflationary pressures or changes will also increase our labour costs. Wage increases in the long-term may reduce our competitiveness and our profitability.

**46. Valuation methodology and accounting practice in paper related businesses may change.**

There is no standard valuation methodology or accounting practices in paper related industries. Additionally, current valuations may also not be reflective of future valuations within the industry. Current valuations of other listed companies, in our industry, may not be comparable with our Company.

**47. Political instability or changes in the Government could adversely affect economic conditions in India and consequently our business.**

Our performance and the market price and liquidity of the Equity Shares may be affected by changes in exchange rates and controls, interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India. The GoI has traditionally exercised and continues to exercise a significant influence over many aspects of the economy. The business of our Company, and the market price and liquidity of the Equity Shares may be affected by changes in GoI policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. There has been a secular reduction in import duties on paper and packaging products over the years. The governments have usually been multi-party coalitions with differing agendas. Any political instability could affect the rate of economic liberalisation and the specific laws and policies affecting foreign investment in the disposable paper industry. Other matters affecting investment in the Equity Shares could change as well. A significant change in India's economic liberalisation and deregulation policies could adversely affect business and economic conditions in India generally, and our business in particular, if new restrictions on the private sector are introduced or if existing restrictions are increased.

**48. A slowdown in economic growth in India could cause our business to suffer.**

Our performance and the growth of our business are necessarily dependent on the health of the overall Indian economy. As a result, a slowdown in the Indian economy could adversely affect our business. India's economy could be adversely affected by a general rise in interest rates, inflation, natural calamities, such as earthquakes, tsunamis, floods and droughts, increases in commodity and energy prices, and protectionist efforts in other countries or various other factors. In addition, the Indian economy is in a state of transition. It is difficult to gauge the impact of these fundamental economic changes on our business. Any slowdown in the Indian economy or future volatility in global commodity prices could adversely affect our business.

**49. Recent global economic conditions have been unprecedented and challenging and have had, and continue to have, an adverse effect on the Indian financial markets and the Indian economy in general, which has had, and may continue to have, a material adverse effect on our business and our financial performance and may have an impact on the price of our Equity Shares.**

Recent global market and economic conditions have been unprecedented and challenging with tighter credit conditions. These factors have led to a decrease in spending by businesses and consumers alike and corresponding decreases in global infrastructure spending and commodity prices. These global market and economic conditions have had, and continue to have, an adverse effect on the Indian financial markets and the Indian economy in general, which has had, and may continue to have, a material adverse effect on our business, our financial performance and may adversely affect the prices of our Equity Shares.

**50. Any downgrading of India's debt rating by an international rating agency could have a negative impact on our business.**

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms

at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the price of our Equity Shares.

**51. *Instability in the Indian financial markets could materially and adversely affect our results of operations and financial condition.***

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in Asian emerging market countries. Financial turmoil in Asia, Europe and elsewhere in the world in recent years and more recently in the United States has affected the Indian economy. Although economic conditions are different in each country, investors reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

**52. *Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect financial markets and our business.***

Terrorist attacks and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, making travel and other services more difficult and ultimately adversely affecting our business.

India has also witnessed civil disturbances in the past years and it is possible that future civil unrest as well as other adverse social, economic and political events in India could have a negative impact on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares. Other acts of violence or war outside India, including those involving the United States, the United Kingdom or other countries, may adversely affect worldwide financial markets and could adversely affect the world economic environment, which could adversely affect our business, results of operations, financial condition and cash flows, and more generally, any of these events could lower confidence in India. South Asia has, from time to time, experienced instances of civil unrest and hostilities among other neighbouring countries.

**53. *The extent and reliability of Indian infrastructure could adversely affect our results of operations and financial condition.***

India's physical infrastructure is less developed than that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our business operations, which could have an adverse effect on our results of operations and financial condition.

**54. *Our business and activities will be regulated by the Competition Act, 2002.***

The Competition Act, 2002 (the Competition Act), several provisions of which have recently been brought into effect, is designed to prevent business practices that have an appreciable adverse effect on competition in India. Under the Competition Act, any arrangement, understanding or action in concert between enterprises, whether formal or informal, which causes or is likely to cause an appreciable adverse effect on competition in India is void and attracts substantial monetary penalties. Any agreement which directly or indirectly determines purchase or sale prices, limits or controls production, shares the market by way of geographical area or market or number of customers in the market is presumed to have an adverse effect on competition. Further, if it is proved that the contravention committed by a company took place with the consent or connivance or is attributable to any neglect on the part of, any director, manager, secretary or other officer of such company, that person shall be guilty of the contravention and liable to be punished.

The effect of the Competition Act on the business environment in India is as yet unclear. If we are affected, directly or indirectly, by any provision of the Competition Act, or its application or interpretation, including any enforcement proceedings initiated by the Competition Commission and any adverse publicity that may be generated due to scrutiny or prosecution by the Competition Commission, it may have a material adverse effect on our business, financial condition and results of operations.

***55. There is no guarantee that the Equity Shares offered under this Issue, will be listed on the Stock Exchange in a timely manner or at all, and any trading closures at the Stock Exchange may adversely affect the trading price of our Equity Shares.***

In accordance with Indian law and practice, permission for listing of the Equity Shares will not be granted until after those Equity Shares have been issued and allotted. Approval will require all other relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the Stock Exchange. Any failure or delay in obtaining the approval would restrict investor's ability to dispose of the Equity Shares in secondary market.

***56. An active market for our Equity Shares may not be sustained, which may cause the price of our Equity Shares to fall.***

While our Equity Shares are traded on the Stock Exchange, there can be no assurance regarding the continuity of the existing active or liquid market for our Equity Shares, the ability of investors to sell their Equity Shares or the prices at which investors may be able to sell their Equity Shares. The price of our Equity Shares on the Stock Exchanges may fluctuate after this Issue as a result of several factors, including volatility in the Indian and global securities market; our operations and performance; performance of our competitors; the perception of the market with respect to investments in the disposable paper industry; adverse media reports about us; changes in the estimates of our performance or recommendations by financial analysts; significant developments in India's economic liberalisation and deregulation policies; and significant developments in India's fiscal regulations. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the prices at which our Equity Shares are initially traded will correspond to the prices at which our Equity Shares will trade in the market subsequent to this Issue.

***57. Any future issuance of Equity Shares may dilute your shareholding, and sales of our Equity Shares by our Promoters or other major shareholders may adversely affect the trading price of our Equity Shares.***

Any future equity issuances by us, including a primary offering, may lead to the dilution of investor's shareholdings in our Company. Any future equity issuances by our Company either in the form of further public issue, qualified institutions placement or pursuant to a preferential allotment shall lead to the dilution of your shareholding in the Company. Any future equity issuances by us or sales of our Equity Shares by our Promoters or other major shareholders may adversely affect the trading price of our Equity Shares. In addition, any perception by potential investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

**Reason for high Inventories in our business: -**

The cost of production for our Company mainly dependent on cost of paper which may fluctuate due to various micro and macro-economic factors. To minimize cost of production it is important our Company to analyse the price trend for paper. The level of inventory is decided keeping in mind the expected price of paper. Due to wide acceptance of paper product the cost of paper is in the rising trend. Our Company maintain the sufficient inventory so as to minimize the impact of price escalation. Typically, our Company maintain inventory for 70 to 85 days to ensure adequate availability of the raw material at a more competitive price.

**Reason for high Trade receivables in our business: -**

To promote sales and remain competitive in the market our Company provide credit period to our customers which range from 70 to 80 days depending on the customers. We face competition not only from the domestic players but also from international player, especially from China. Our Company face stiff competition from the Chinese sellers as China provide export subsidiary to the manufactures on export. Additionally, our Company faces intense competition from the large number of domestic manufactures of paper cup blanks, food grade papers and other paper products who operate in different regional market and various levels. Our credit policy also dependent on the demand of our products in domestic and international markets which has the bearing on various macro and micro economic factors.

This growth was primarily driven by increased demand for our products. The sale volume increased from 9,621.55 MT in Fiscal 2024 to 12,626.35 MT in Fiscal 2025, reflecting a 31.23% increase. Additionally, our Company added new products in Fiscal 2025, such as Paper MTR /OTR and OGR Paper which contributed Rs. 285.18 lakhs and Rs. 427.75 lakhs or 2.51% and 3.76% respectively in the overall sales mix. It is pertinent to note that the revenue for Fiscal 2024 was adversely impacted by a fire incident at our factory on May 05, 2023, which led to the loss of a significant quantity of raw material inventory. Consequently, the operations remained shut for approximately two months due to infrastructure restoration, insurer surveys, and resource realignment. The lower revenue base in Fiscal 2024 also contributed to the sharp year-on-year growth in Fiscal 2025.

As per the Restated Standalone Financial Statement, our profit after tax increased by Rs. 628.80 lakhs or 157.76% to Rs. 1,027.39 lakhs for Fiscal 2025 as compared to Rs. 398.59 lakhs for Fiscal 2024, for further information in respect of changes in profits, please refer to the chapter titled “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” beginning on page 218.

#### Global Macroeconomic Landscape

##### Global Economic Overview

The global economy, which recorded GDP growth at 3.3% in CY 2024, is expected to show resilience at 2.8% in CY 2025. This marks the slowest expansion since 2020 and reflects a -0.5% point downgrade from January 2025 forecast. Moreover, the projection for CY 2026 has also reduced to 3.0%. This slowdown is majorly attributed due to numerous factors such as high inflation in many economies despite central bank effort to curb inflation, continuing energy market volatility driven by geopolitical tensions particularly in Ukraine and Middle East, and the re-election of Donald Trump as US President extended uncertainty around the trade policies as well as overall global economic growth. High inflation and rising borrowing costs affected the private consumption on one hand while fiscal consolidation impacted the government consumption on the other hand. As a result, global GDP growth is estimated to moderate by 2.8% in CY 2025 as compared to 3.3% in CY 2024.

*Note: Advanced Economies and Emerging & Developing Economies are as per the classification of the World Economic Outlook (WEO). This classification is not based on strict criteria, economic or otherwise, and it has evolved over time. It comprises of 40 countries under the Advanced Economies including the G7 (the United States, Japan, Germany, France, Italy, the United Kingdom, and Canada) and selected countries from the Euro Zone (Germany, Italy, France etc.). The group of emerging market and developing economies (156) includes all those that are not classified as Advanced Economies (India, China, Brazil, Malaysia etc.)*

##### Historical and Projected GDP Growth

GDP growth across major regions exhibited a mixed trend between 2022-23, with GDP growth in many regions including North America, Emerging and Developing Asia, and Emerging and Developing Europe slowing further in 2024. In 2025, GDP growth rate in Emerging and Developing Asia (India, China, Indonesia, Malaysia, etc.) is

expected to moderate further to 4.5% from 5.3% in the previous year, while in the North America, it is expected to moderate to 1.8% in CY 2025 from 2.8% in CY 2024.

Source-IMF World Economic Outlook April 2025 update.

Except Middle East & Central Asia, all other regions like Emerging and Developing Asia, Emerging and Developing Europe, Latin America & The Caribbean, Sub Saharan Africa and North America, are expected to record a moderation in GDP growth rate in CY 2025 as compared to CY 2024. Further, growth in the United States is expected to come down at 2.71% in CY 2025 from 2.80% in CY 2024 due to lagged effects of monetary policy tightening, gradual fiscal tightening, and a softening in labour markets slowing aggregate demand.

### Global Economic Outlook

The global economy is navigating a period of exceptional uncertainty. Policy shifts, particularly those reshaping trade, have alarmed financial markets and bruised business sentiment. The U.S.’s reciprocal tariffs, which represent additional costs for businesses from almost all countries with which the U.S. trades, charge trade partners an import duty at a discounted rate of approximately half the rate that the trade partner currently imposes on the U.S. According to U.S. President Donald Trump, reciprocal tariffs, ranging from 10% to 50%, are meant to address trade barriers limiting U.S. exports. The *effective* tariff rate includes other tariffs imposed at an earlier date and cumulatively may now be higher than duties charged on U.S. imports. It is unclear whether the reciprocal tariffs represent a negotiating tool, and may therefore be temporary, or form part of broader long-term protectionist measures and industrial strategy.

Responses to reciprocal tariffs have been varied, with some economies promising swift countermeasures. More than 50 markets have sought negotiations with the US. While Malaysia is seeking a united response across ASEAN, the Chinese Mainland has retaliated with duties on all imports from the U.S., declaring it will “fight to the end”. In early April 2025, the U.S. confirmed the most aggressive steps yet, with a cumulative 145% tariff on some products imported from the Chinese Mainland. Brazil has readied itself by passing a bill allowing for retaliation, Australia has ruled out retaliatory levies, and the EU remains open to negotiation while preparing a package of countermeasures.

Tariffs and their unpredictable application have weighed on consumer and business sentiment, sunk global stock markets, raised recession risks, and made a global slowdown more likely. Our latest Global Business Optimism Insights report indicates a further decline in business optimism as firms continue to grapple with trade-related policy uncertainty and its broader economic implications. Export-driven sectors reported sharp declines in optimism. Financial risk perceptions remain elevated as businesses contend with high borrowing costs and persistent inflation expectations. More broadly, the uncertainty is reflected in delayed capital expenditure and a pullback in hiring.

Tariffs have begun to exert pressure on central banks by contributing to inflationary pressures and increasing financial market volatility. Central banks are adjusting forward guidance and policy frameworks and may begin to consider the likelihood of softer growth being a bigger priority than high inflation by starting to cut interest rates to support economies. For businesses, this uncertainty translates into unpredictable cost structures, fluctuating credit availability, and the management of operational costs through diversified supply networks.

The latest Dun & Bradstreet Global Business Optimism Insights report reveals a further decline in business optimism, though at a more moderate pace than in the prior quarter, as businesses continued to grapple with trade-related policy uncertainty and its broader economic implications. Export-driven sectors such as automotives, electricals, and metals saw sharp declines in optimism, particularly in the U.S., Mexico, South Korea, and Japan, where rising tariffs and shifting trade policies have fueled cost pressures and demand volatility. Financial risk perceptions remain elevated.

### Global Growth Projection

At broader level, the global economy is expected to experience a slowdown in 2025, with GDP growth projected to decline to 2.8%, down from 3.3% in 2024. This deceleration reflects persistent inflationary pressure, geopolitical uncertainties and tightened monetary policies. However, a slight recovery is anticipated in 2026, with growth projected to improve to 3.0%. Global inflation is expected to decline steadily, to 4.3% in 2025 and to 3.6% in 2026. Inflation is projected to converge back to the target earlier in advanced economies, reaching 2.2% in 2026, whereas in emerging market and developing economies, it is anticipated to decrease to 4.6% during the same period. Trade tariffs function as a supply shock for the countries imposing them, leading to a decrease in productivity and an increase in unit costs. Countries subject to tariffs experience a negative demand shock as export demand declines, placing downward pressure on prices. In each scenario, trade uncertainty introduces an additional layer of demand shock since businesses and households react by delaying investment and spending, and this impact could be intensified by stricter financial conditions and heightened exchange rate volatility. Moreover, Global trade growth is expected to slow down in 2025 to 1.7%. This forecast reflects increased tariff restrictions affecting trade flows and, to a lesser extent, the waning effects of cyclical factors that have underpinned the recent rise in goods trade. Geopolitical tensions as seen in the past such as the wars in Ukraine and the Middle East could exacerbate inflation volatility, particularly in energy and agricultural commodities.

### India Macroeconomic Analysis

India emerged as one of the fastest growth economies amongst the leading advanced economies and emerging economies. In CY 2024, even amidst geopolitical uncertainties, particularly those affecting global energy and commodity markets, India continues to remain one of the fastest growing economies in the world and is expected to grow by 6.2% in CY 2025 and 6.3% in CY 2026.

Private Final Expenditure (PFCE) a realistic proxy to gauge household spending, observed growth in FY 2025 as compared to FY 2024. However, quarterly data indicated some improvement in the current fiscal as the growth rate improved over the corresponding period in the last fiscal.

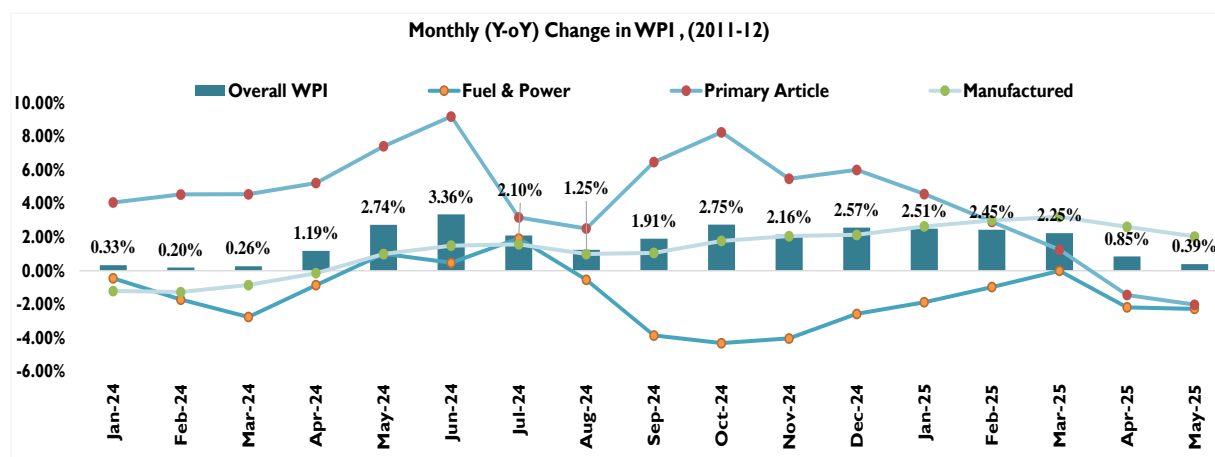

### Inflation Scenario

The inflation rate based on India's Wholesale Price Index (WPI) exhibited significant fluctuations across different sectors from January 2024 to May 2025. The annual rate of inflation based on All India Wholesale Price Index (WPI) number is 0.39% (provisional) for the month of May 2025 (over May 2024). Positive rate of inflation in May 2025 is primarily due to increase in prices of manufacture of food products, electricity, other manufacturing, chemicals and chemical products, manufacture of other transport equipment and non-food articles etc.

By May 2025, Primary Articles (Weight 22.62%), The index for this major group decreased by 0.05 % to 184.3 (provisional) in May 2025 from 184.4 (provisional) for the month of April 2025. ### Growth Outlook

The Union Budget 2025-26 has laid the foundation for sustained growth by balancing demand stimulation, investment promotion and inclusive development. Inflation level is reaching within the central bank's target; the RBI may pursue further monetary easing that will support growth. The medium-term outlook is bright, fueled by the emphasis on physical and digital infrastructure spending. With a focus on stimulating demand, driving investment and ensuring inclusive development, the budget introduces measures such as tax relief, increased infrastructure spending and incentives for manufacturing and clean energy. These initiatives aim to accelerate growth while maintaining fiscal discipline, reinforcing India's long-term economic resilience. The expansion of tax relief i.e zero tax liability for individuals earning up to INR 12 lacs annually under the new tax regime is expected to strengthen household finances and, consequently, boost consumption.

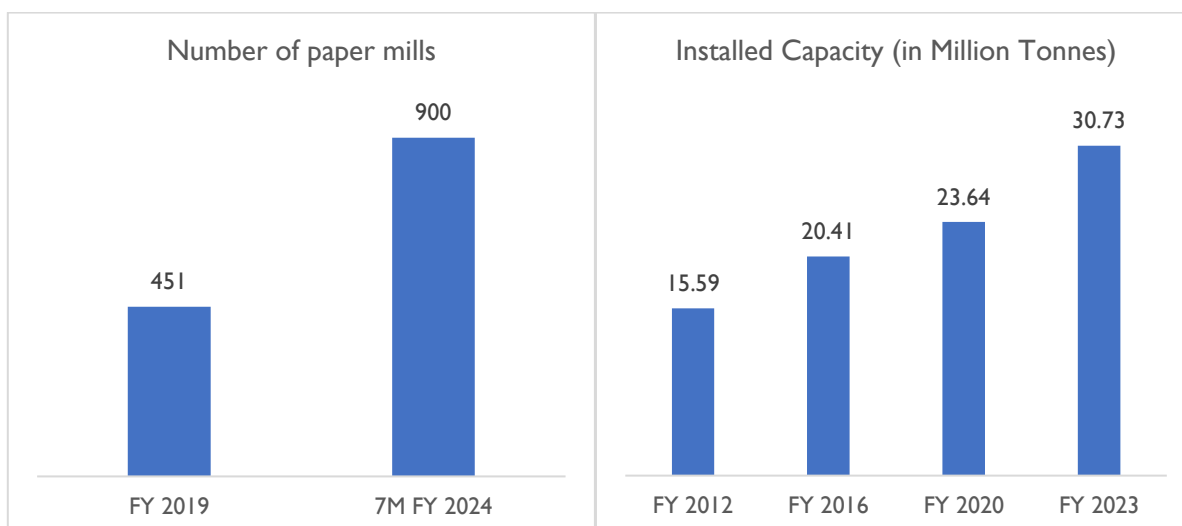

The external sector remains resilient, and key external vulnerability indicators continue to improve. However, tariff-related uncertainty is likely to weigh on exports and investment, prompting us to cut our FY26 GDP growth forecast to 6.3%.

### Overview of the Indian Paper Industry

According to Indian Paper Manufacturers Association (IPMA), the Indian paper industry accounts for about 5% of the world's production of paper. The estimated turnover of the industry is over INR 70,000 crore with domestic market size estimated at INR 800 billion and its contribution to the exchequer is around INR 50 billion. Paper is a labour-intensive industry in India. The industry provides direct employment to 0.5 million persons, and indirectly to around 1.5 million.

India is the 15<sup>th</sup> largest paper producer in the world. The country has emerged as the fastest growing market when it comes to consumption. The per capita paper consumption in India at around 19 kg. The domestic market of paper is over 16 million tons per annum (MTPA), with over 2 MTPA being imported. Paper consumption is likely to witness 6-7% annual growth and will reach 30 million tonnes by FY 2026-27, largely driven by emphasis on education and literacy.

A majority of the paper mills comprise of diverse technological landscape, ranging from the oldest to the most modern technologies. These mills utilize various raw materials, including wood, bamboo, recycled fibre, bagasse, wheat straw, and rice husk. The production shares indicate that approximately 18% are based on wood, 75% on recycled fibre, and 7% on agro-residues.

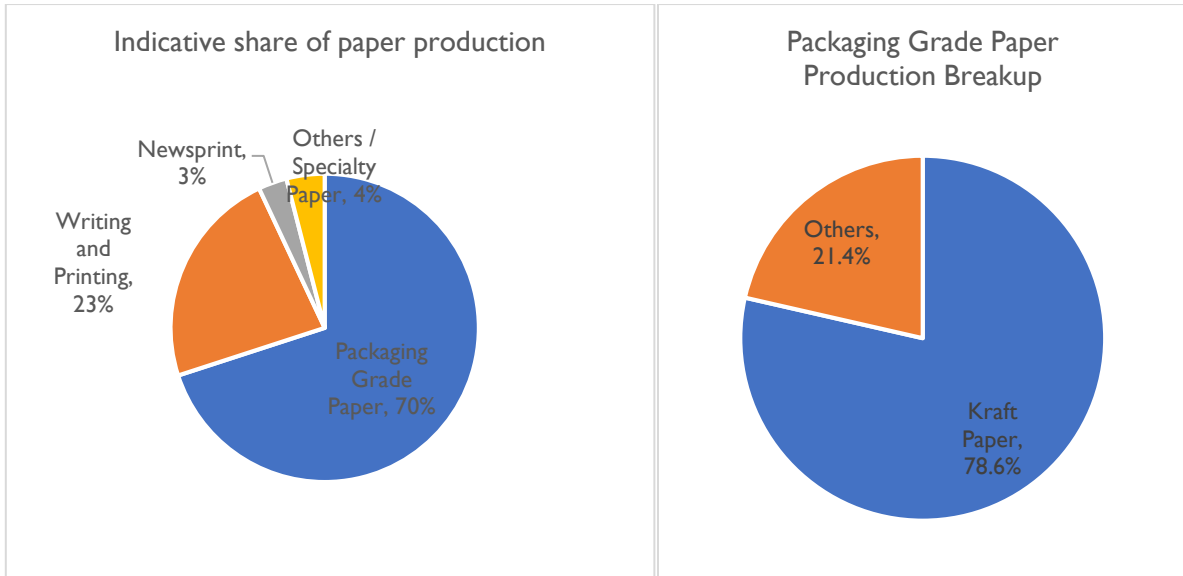

Source: Indian Pulp & Paper Technical Association, Department for Promotion of Industry and Internal Trade, Annual Report 2023-24, D&B Research

According to industry sources, the paper & pulp industry has an estimated 900 paper mills, of which 550 are operational. The collective installed capacity stands at an estimated 30.73 million tonnes, portraying the industry's robust and expansive presence.

### Major Paper Product Segmentation

Major Types of Paper	
Printing & Writing Paper	Uncoated (Creame Woven, Copier, Maplitho), Coated
Industrial Paper/ Paperboard	Kraft Paper, Duplex Boards
Newsprint	Glazed paper, standard paper
Specialty Paper	Tissue Paper, tissue paper/hygiene paper, insulation paper, filter paper, greaseproof paper, absorbent paper for laminates,

On account of being an eco-friendly and biodegradable product, packaging grade paper including kraft paper and duplex paper/board dominates the sector with 70% of total production where kraft paper alone is estimated to contribute nearly 55% share. Writing & printing paper accounts for approximately 23% of the total paper produced in India. Newsprint accounts for about 3% of the paper produced in the country. Other varieties produced in the country include tissue paper/hygiene paper, insulation paper, filter paper, greaseproof paper, absorbent paper for laminates, etc which together contributed nearly 4% share of the total paper production.

### Paper Cup Stocks and Food Grade Papers

Within the paper industry, the Food Service Packaging industry, a key segment of the Paper and Packaging sector, is experiencing heightened demand for sustainable solutions. In the paper and pulp industry, paper cup stock accounts for approximately 2% of the market. This raw material is specifically used for producing paper cups. Typically, paper cup stock is a type of paperboard or paper laminate that is designed to be water-resistant, making it suitable for containing liquids. To enhance the cups' resistance to liquids, the paper cup stock is often coated with a thin layer of polyethylene (PE) or a similar material. This coating acts as a barrier against moisture and helps prevent leaks. Paper cup stocks with different grades and varieties are designed for food service applications, ensuring safe direct contact, durability, and environmental friendliness. As businesses increasingly move away from plastic, paper-based packaging is emerging as a preferred alternative in retail and food services. Below listed are variety for cup stocks and food grade paper that are being used in the food and beverages segment.

#### **Paper Cup Blanks**

##### PE Coated Paper Cup Blanks

These paper cup blanks are coated with food-grade polyethylene (PE), providing excellent moisture and grease resistance, which is essential for handling both hot and cold beverages. The PE coating enhances the cup's durability, helping prevent leaks and maintaining the structural integrity of the cup. These cups are highly popular in high-traffic settings, such as cafes, restaurants, and quick-service outlets, where quality and dependability are critical.

##### PLA Coated Paper Cup Blanks

Poly-lactic acid or PLA coated paper cup blanks serve as an eco-friendly alternative to traditional PE-coated cups. PLA being a biodegradable material, the PLA coated cups are compostable, providing an environmentally sustainable option without compromising on durability or leak resistance. Aligning with the sustainability goals, these paper cup blanks are perfect for those aiming to minimize their environmental footprint in food service settings.

##### Barrier Coated Paper Cup Blanks

These paper cup blanks feature a specialized barrier coating, enhancing their resilience to moisture and grease. Suitable for both hot and cold beverages, the barrier-coated cups are designed to offer extended performance and reduce leak risks. This coating provides an additional layer of protection, making these blanks a reliable choice for beverages that require long-lasting structural stability.

## Food Grade Papers

### Greaseproof Paper

Greaseproof paper is engineered to resist oils and fats, ensuring that food retains its flavor and appearance. Its breathable composition allows food to stay fresh and crisp without becoming soggy, making it an ideal choice for packaging greasy food items. Suitable for various environments, including freezers and ovens, this paper can handle a range of temperatures and humidity levels. Available in white and other colors in 40-60 GSM, it is commonly used to package burgers, sandwiches, French fries, and other snack foods.

### Greaseproof Slip Easy Paper

With an innovative anti-slip surface, slip-easy greaseproof paper is specially designed to keep packaged items securely in place. The anti-slip feature prevents products from shifting, making it ideal for applications where presentation and stability are crucial, such as in packaging bakery items and delicate snacks. Available in 40-60 GSM and a variety of colors, this paper is commonly used for cupcakes, muffins, pastries, and sweets.

### Wet Strength Greaseproof Paper

This paper combines grease resistance with enhanced wet strength, making it ideal for packaging items exposed to moisture, such as deli meats, salads, and sauces. It remains strong and durable even in wet or humid conditions, ensuring that products are securely packaged. Offered in 45 GSM, it is perfect for wrapping meats, fish, and frozen food products.

### Bake Oven Paper

Designed for high-temperature applications, bake oven paper is suitable for use as a tray liner for baking. It can withstand temperatures up to 230°C and supports multiple bakes (up to four times), making it highly economical and versatile. With high density and stability, this paper is ideal for conventional and microwave baking, available in 40-60 GSM and various colors, including classic white. Typical applications include baking cakes, cookies, pizza, and bread.

### Vegetable Parchment Paper

Vegetable parchment paper offers exceptional grease resistance and oil hold-out properties, making it ideal for food packaging and baking applications. It undergoes a specialized manufacturing process that eliminates the need for acid treatment, enhancing its purity and making it food-safe.

## End Uses of Cup Stocks:

Different varieties of cup stocks are used for making disposable paper cups and glasses that are popular single-use tableware items, predominantly used for serving beverages, but they also extend to certain food items due to their versatile, lightweight, and hygienic properties. These items are crafted to be sturdy, leak-resistant, and easy to handle, making them a preferred choice in various settings. While disposable cups are available in materials like plastic, foam, and paper, paper cups are particularly favoured for their eco-friendly attributes and biodegradable nature, positioning them as a sustainable alternative to conventional plastic.

Based on their application and structural design, paper cups are classified into several types to serve different uses across different segments like:

**Single-Wallpaper Cups:** These are the most common, lightweight, and economical option. They are popular for serving beverages like water, soft drinks, and some cold teas, especially in high-traffic areas such as workplaces and casual events.

**Double-Wallpaper Cups:** Often used for hot beverages, double-wall cups provide an extra layer of insulation, making them suitable for serving coffee, tea, and other hot drinks in cafés, restaurants, and on-the-go service points. The additional layer not only keeps beverages warmer for longer but also provides added comfort by preventing heat transfer to the user's hand.

**Corrugated Ripple Paper Cups:** Designed for added insulation and grip, these cups are a premium option for hot beverages. The ripple design reduces the need for cup sleeves, enhancing both convenience and presentation. Corrugated ripple cups are commonly used in premium café settings or in events where aesthetics and quality are prioritised.

**Compostable/Biodegradable Paper Cups:** These eco-friendly options are gaining traction among environmentally conscious consumers and businesses. They often feature plant-based coatings, making them fully compostable and aligning with sustainable waste management practices.

### Capacity and Size Variants

Paper cups are manufactured in various capacities to accommodate a broad range of beverage and food requirements:

**Up to 150 ml:** Suitable for quick, small servings, commonly used in office settings, small gatherings, stalls, for tea, coffee, and water.

**150 to 350 ml:** Standard size for on-the-go beverages, popular in coffee shops and fast-food outlets.

**350 to 500 ml:** Ideal for larger servings, such as smoothies or milkshakes, offering convenience for extended consumption.

**Above 500 ml:** Often used in specialised settings, such as juice bars or take-out orders, for customers looking for substantial servings.

### Different Varieties and grade of paper cup stocks being used by different sectors:

Paper cups derived by paper cup stocks are segmented based on their application:

**Beverage Use:** The beverage segment includes both hot beverages (such as tea, coffee, and soups) and cold beverages (like iced coffee, juice, and smoothies).

- Hot beverage cups are typically made with insulated designs (double-wall or ripple-wall) to prevent discomfort and ensure safe handling.
- Cold beverage cups are simpler in structure but may include lids for secure transportation.

**Food Use:** Beyond beverages, paper cups are gaining popularity in food applications. They are used for serving items like ice creams and desserts, soups and noodles, sauces and dressings, bakery products, and even small confectionery items. In these applications, paper cups help maintain hygiene and ease of consumption, making them suitable for both dine-in and takeaway options in quick-service restaurants.

### End-Use Segmentation.

The end-use segmentation of paper cups in India can be divided into:

**Commercial Use:** This includes sectors like cafés, restaurants, hotels, catering services, offices, bars/clubs, and educational institutions. In commercial settings, paper cups are preferred due to their hygienic, single-use design, which reduces the need for cleaning and minimises the spread of food-borne illnesses. Branding through customised prints on cups is also common in this sector, enhancing brand visibility and appeal to patrons.

**Household/Residential Use:** Although less prominent than in commercial sectors, disposable paper cups are increasingly popular in households for events and gatherings, where convenience is prioritised. Consumers in this segment typically prefer smaller sizes for casual use, such as tea and coffee

## Manufacturing Process of Disposable Cups:

The production of disposable paper cups primarily involves high-quality cellulose paperboard sourced from renewable resources like wood pulp, making the product both sustainable and environmentally responsible. Generally, about 95% of a paper cup’s structure consists of this paperboard, which undergoes rigorous processing to meet food-grade standards. These standards are crucial, ensuring that the material remains non-toxic and safe for both hot and cold consumables. The inner lining, which constitutes approximately 5% of the cup’s composition, is usually made from polyethylene (PE) to create a waterproof barrier, preventing leaks and adding durability. Some cups incorporate a biodegradable or compostable coating derived from plant-based materials (such as PLA, or polylactic acid) to further enhance their environmental profile.

Paper cups come in varying grades to cater to different needs. For example:

**Standard Grade:** Often single-wall, ideal for cold drinks or minimal contact hot beverages.

**Insulated Grade:** Double-wall or ripple-wall varieties designed for hot beverages, adding insulation to keep drinks warm without causing discomfort to the user’s hand.

**Premium Grade:** May include thicker paperboard and high-quality coating suitable for branding purposes or high-end service settings like upscale cafés and restaurants.

### Market Scenario:

According to the Indian Paper Manufacturers Association, the total domestic consumption of the paper pulp industry in India reached 23.039 million metric tonnes in FY 2024. Within this, paper cup stock contributed 1.6% of the total consumption, amounting to approximately 309 thousand tonnes.

The demand for paper cup stocks is projected to grow at an impressive rate of 10.5% annually, driven by the increasing adoption of eco-friendly and biodegradable products in both domestic and international markets. This growth is further supported by a rising awareness of environmental concerns, government regulations aimed at reducing plastic use, and the expanding food and beverage sector, which relies heavily on disposable paper cups. This positive outlook signals significant opportunities for manufacturers and suppliers in the paper cup stock industry.

## Domestic Demand Scenario

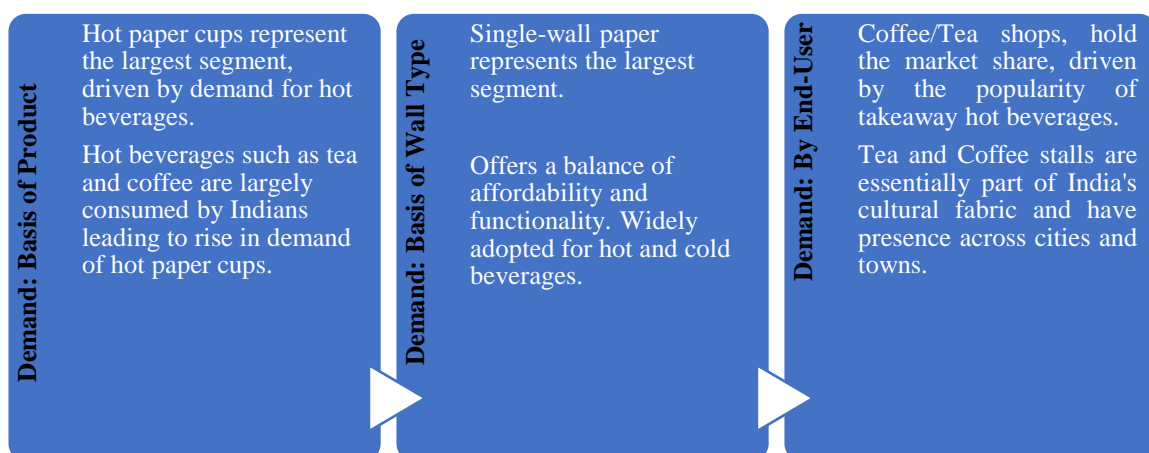

The demand of paper cup stocks is dependent on the disposable cups demand in the market and the evolution of disposable paper cups and glasses in India traces its origins to modest beginnings, when the concept of single-use tableware was relatively novel. In a country where street-side tea stalls, bustling cafés, and food vendors have always held a central place in the social and cultural fabric, the introduction of disposable cups offered a convenient and hygienic alternative. Initially limited in usage, these cups gained popularity as the demand for quick-service solutions rose, driven by both consumer preferences and market dynamics.

Several policy and market developments have catalysed the expansion of the disposable cup market. One of the pivotal moments for the industry was the imposition of bans on single-use plastic products in multiple Indian states, following a surge in environmental concerns over plastic waste. This regulation, combined with a broader societal push for sustainable practices, directed the market's focus toward paper-based alternatives. Moreover, the COVID-19 pandemic acted as an accelerator, bringing hygiene to the forefront of consumer priorities. Disposable paper cups and glasses became critical in maintaining sanitary conditions across restaurants, cafés, hospitals, and public venues, helping minimise potential contamination and prevent disease spread.

Culturally, the shift to paper cups aligns well with India's diverse beverage and food culture. Indians consume a wide range of drinks—chai, coffee, lassi, buttermilk (chaas), juices, and soups—and disposable cups cater to this variety. The large street vendor culture, where quick and hygienic service is paramount, has embraced disposable paper cups to deliver an easy, safe solution to customers who increasingly prefer single-use cups over reusable glasses. In food establishments, particularly in urban areas, the awareness of hygiene standards has heightened, leading to a demand for single-use options in place of traditional glass or ceramic cups, which may raise concerns over cleanliness.

In recent years, café culture, hospitality industry as well as events (festive, corporate) have also spurred growth, with businesses exploring innovations such as 3D-printed and custom-designed cups to cater to premium preferences. Increased awareness around sustainability has further encouraged the use of biodegradable coatings and plant-based laminates, enhancing the eco-friendly appeal of disposable cups. Additionally, paper cups, often customizable with aesthetically appealing designs, serve as both a functional and attractive solution for businesses aiming to reinforce sustainable practices. As consumers become more conscious of their environmental impact, they seek out products that align with their values, prompting manufacturers to develop new materials and coatings that meet biodegradable or compostable standards.

## Demand Scenarios in Specific Market Segments

The market is segmented by region into Maharashtra, Uttar Pradesh, Tamil Nadu, West Bengal, Gujarat. Maharashtra leads as the largest market for paper cups in India.

### Key Drivers/ Factors Driving Demand

- **Stringent Government Regulations and Initiatives Aimed at Reducing Plastic Usage:** The Indian government has introduced stringent regulations to limit single-use plastics, aiming to address critical environmental concerns. The Plastic Waste Management (PWM) Amendment Rules, 2021, led to a significant shift by banning various single-use plastic items across the country, including plastic cutlery, straws, and packaging widely used in the food and beverage industry. This policy has spurred demand for eco-friendly alternatives, with disposable paper cups emerging as a popular choice. Further restrictions by several state and local governments have accelerated this trend by incentivizing businesses to explore sustainable solutions. The PWM amendments have created an ideal environment for paper disposables as businesses and consumers align with these new regulations. Additionally, consumer awareness about environmental impact has strengthened support for such policies, as the public becomes increasingly engaged with eco-conscious consumption practices. This alignment with government regulations ensures a consistent demand for disposable paper cups in urban areas and across Tier 2 and 3 cities, where public compliance with eco-friendly regulations is also encouraged through fines and penalties. These policies have also fueled investment and innovation in the production of biodegradable materials, making disposable paper cups more affordable and accessible across diverse segments of the Indian market.
- **Hygiene and Cleanliness as Priority:** The COVID-19 pandemic shifted consumer behaviour substantially, making hygiene and cleanliness critical considerations. This change in consumer mindset has had a lasting impact on the demand for disposable paper cups, particularly in cafes, hospitals, and public venues, where single-use items were quickly adopted to prevent contamination risks. In medical settings, disposable cups have become essential, aiding in infection control by limiting potential exposure to pathogens. This heightened focus on hygiene extended to public service settings, workplaces, and even households, where disposable items are now preferred for safety reasons. Consumer perception of paper cups as a more hygienic alternative to reusable options has led to increased adoption in food establishments and among street vendors, who must adhere to elevated hygiene standards. This demand is particularly pronounced in high-traffic locations, from hospitals to cafes, where single-use products reduce the risk of contamination and align with public health guidance.
- **Growing Food and Beverage Industry with Rising Number of QSRs:** India's food services sector is poised for substantial expansion, projected to grow at a compound annual growth rate (CAGR) of 8.1% from 2024 to 2028.<sup>1</sup> Urbanization, economic growth, and a younger population drive this growth, making disposable packaging a practical solution for the food and beverage industry. The rapid rise in cafes and QSRs has elevated the demand for convenient packaging solutions like disposable paper cups, which cater to consumer expectations for quick service and hygiene. Urban areas, especially Tier 1 cities, have seen a rapid rise in the 'café culture,' with many opting for paper cups to enhance the customer experience. The growth of cafes in India, driven by the rise in the trend of people working remotely or freelancing, has led to an increased demand for comfortable and functional workspaces that also offer food and beverages, leading to the emergence of coworking cafes. Capitalising on India's long-standing tea and coffee culture, the country's cafes and bars market are estimated to be valued at 17.54 billion USD in 2024. Additionally, traditional Indian events, such as birthday, weddings, religious gatherings, and cultural events, have also started integrating eco-friendly disposables. In these settings, disposable paper cups have become increasingly popular, especially in urban and elite areas, where consumers are more mindful of their environmental footprint. Such events, which attract large gatherings, provide a platform for disposables as a practical solution while supporting the eco-friendly shift.

- Rising of Middle-class and Disposable Income:** India's growing middle-class segment, which now encompasses around 100 million individuals<sup>2</sup>, is a significant driver for paper cup demand. As disposable incomes rise, consumers are increasingly willing to invest in premium experiences like specialty coffees and café culture, which rely heavily on disposable paper cups. This trend reflects a cultural shift towards frequenting cafes and restaurants that prioritise both convenience and environmental responsibility. Urban consumers in this demographic, particularly the younger population, are attuned to sustainable practices and prefer products that align with their values. The ban on single-use plastics has further bolstered this shift, encouraging consumers to opt for paper-based disposables as accessible and sustainable alternatives. As a result, paper cups are now synonymous with environmentally responsible choices and continue to gain traction across diverse consumer segments, from high-end cafes to neighbourhood food vendors.
- Growth of Online Food Deliveries:** India's online food delivery market has also seen substantial growth, with approximately 66 million users engaging with food delivery platforms among the urban population.<sup>3</sup> This figure has shown consistent mid-single-digit growth over recent years, reflecting a strong shift toward convenience in urban dining habits. This surge in online food ordering has driven the demand for disposable packaging, as restaurants and delivery services look for hygienic, single-use options like paper cups to maintain food safety and service efficiency.

As urban dining habits evolve, the demand for hygienic, disposable packaging continues to increase. Food delivery platforms prioritise customer safety, making disposable paper cups ideal for orders, especially given that the packaging ensures both customer and worker health. Paper cups, being lightweight, easy to transport, and safe for disposal, address these needs while supporting eco-conscious consumer trends in India's expanding online food market.

**Corporate Sustainability Commitments and Customization in Packaging:** A growing number of companies are embracing sustainability by adopting paper-based cutlery and packaging as part of their eco-conscious practices. This shift to paper-based disposables reflects corporate commitment to environmental responsibility, and businesses are increasingly highlighting their use of eco-friendly materials to meet consumer expectations and enhance brand image. These sustainability goals resonate with consumers, driving a preference for brands that prioritise environmental impact reduction. The movement toward sustainable consumption has directly impacted the demand for disposable paper cups. As consumers become more environmentally aware, they prefer products made from biodegradable and recyclable materials. Paper cups meet this demand by offering an eco-friendly alternative to plastic, with many brands further elevating the experience by using customizable designs and plant-based laminates. This approach not only appeals to eco-conscious consumers but also enables businesses to showcase their commitment to sustainability.

Customization trends have also emerged in the café and QSR sectors, where businesses use branded, visually appealing designs to enhance the customer experience and create brand recall. Innovations in design and material have improved the aesthetic and functionality of paper cups, making them more attractive and reinforcing their role as a sustainable option in the marketplace. This customization trend has contributed to the sustained growth of paper cup demand, especially in establishments where brand identity and consumer experience are key priorities.

- 48236900: Paper Cup Bobbin (Bottom/ Paper Cup/ Paper Blank/Paper Cup Printed sheet, Paper Cup Roll)

The Paper & Packaging sector paper trade has shown variable growth over recent fiscal years, reflecting fluctuations in both value and volume. In FY 2020, exports stood at INR 0.7 billion, with an export volume of 102.0 million tonnes. The following year, FY 2021, saw a rise in both value and volume, with exports reaching INR 0.9 billion and 124.6 million tonnes respectively. This growth continued significantly in FY 2022, achieving a remarkable peak with export value increasing to INR 1.7 billion and volume surging to 201.3 million tonnes. This spike was likely driven by strong global demand for paper products and increased utilization of sustainable packaging solutions, which has become a global trend.

Source: Ministry of Commerce, D&B analysis

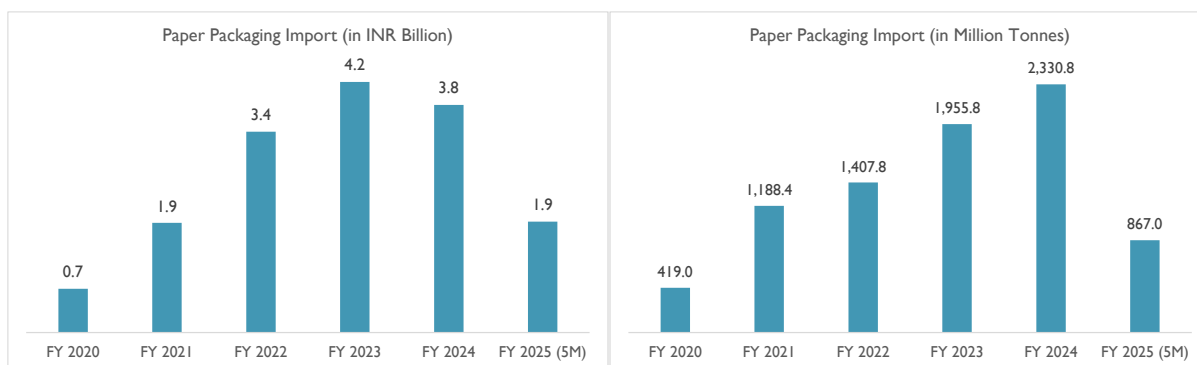

However, the trend reversed sharply in FY 2023, where export value dropped to INR 0.7 billion and volume fell to 153.3 million tonnes. This downturn could have resulted from changes in international demand, evolving trade regulations, or supply chain disruptions affecting the industry. In FY 2024, exports recovered somewhat, reaching INR 1.4 billion in value and 120.7 million tonnes in volume. Though improved from the previous year, these figures suggest continued market challenges and an evolving landscape for paper exports. The data for FY 2025 (the first 5 months) shows exports reaching INR 0.6 billion and 58.0 million tonnes in value and volume, indicating that while there is a steady flow of exports, the total annual figures may not meet the high levels seen in FY 2022 if the current trend continues. Overall, this data highlights the dynamic nature of the paper packaging export market and the need for strategic adjustments to maintain stability and growth.

### Export Percentage Share

When examining the export share in terms of volume, uncoated paper sheets and rolls constitute the largest segment, making up 68% of the total paper packaging export volume. This high percentage highlights the substantial global demand for uncoated paper, likely driven by its wide range of applications across industries. Paper cup bobbins follow, accounting for 19% of export volume, reflecting significant usage for disposable cups in the food and beverage industry. Coated paper rolls and sheets make up the remaining 13%, underscoring a niche demand for specialized coated paper products that cater to more specific packaging requirements.

### Import of Paper & Packaging

India's paper and packaging import sector has experienced substantial growth over the past five fiscal years, driven by increasing domestic demand for both raw and finished paper products. In FY 2020, imports were valued at INR 0.7 billion with a volume of 419.0 million tonnes. This initial figure quickly escalated in FY 2021, with import value soaring to INR 1.9 billion and volume rising sharply to 1,188.4 million tonnes. This trend continued in FY 2022, as imports reached INR 3.4 billion in value and 1,407.8 million tonnes in volume, reflecting strong domestic consumption and possible shortages of domestically produced paper and packaging materials.

Source: Ministry of Commerce, D&B analysis

The upward trajectory was most notable in FY 2023, with imports reaching INR 4.2 billion in value and a volume of 1,955.8 million tonnes. This marked a significant increase, as India faced rising demand in sectors like packaging, e-commerce, and manufacturing, which all rely heavily on paper materials. By FY 2024, imports slightly decreased in value to INR 3.8 billion, yet volumes reached an all-time high of 2,330.8 million tonnes. This discrepancy between value and volume growth may indicate a shift toward importing lower-cost or recycled paper materials to meet demand sustainably and cost-effectively.

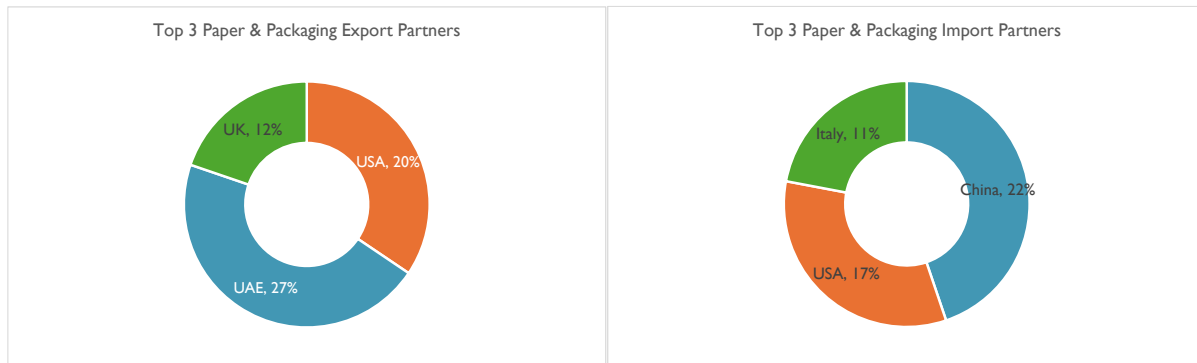

The first five months of FY 2025 shows imports of INR 1.9 billion with 867.0 million tonnes in terms of value and volume. If this trend continues, it suggests that India’s total paper and packaging import volume may again surpass previous years, while the value might stabilize or grow more modestly. This growth in imports highlights a strong dependence on foreign paper resources to support expanding industries, reinforcing the need for India’s paper and packaging sector to consider further domestic capacity expansion to reduce reliance on imports.

### Import Percentage Share

When evaluating the import percentage share based on volume, paper scrap overwhelmingly dominates, accounting for 98.0% of the total paper and packaging imports. This high proportion reflects India’s strong demand for recycled paper materials, which are crucial for producing various packaging products. The remaining segments have relatively minor shares: uncoated paper sheets and rolls represent 1.4% of import volume, while coated paper rolls and sheets and paper cup bobbins makeup 0.5% and 0.0%, respectively. This volume distribution underscores a heavy reliance on paper scrap imports to meet domestic recycling and manufacturing needs, with minimal import dependence on other types of paper products.

### Trade Partners

India’s top export partners for paper and packaging materials reflect strong demand in prominent global markets. The United Arab Emirates (UAE) leads with a 27% share, signifying robust trade relations and possibly catering to the UAE’s dynamic packaging needs, driven by its thriving retail and e-commerce sectors. The United States follows with a 20% share, highlighting the high demand for sustainable packaging materials as American companies increasingly prioritize environmentally friendly imports. The United Kingdom, contributing 12% to India’s export volume, rounds out the top three export destinations. This strong presence in the UK market could reflect consistent demand for paper and packaging solutions in various industries, from food service to retail packaging, where paper-based products offer an attractive, eco-friendly alternative to plastic. Together, these countries account for a significant share of India’s export revenue in paper and packaging, emphasizing the growing global reliance on India for sustainable paper-based solutions.

Source: Ministry of Commerce, D&B analysis

India's paper and packaging imports are primarily dominated by China, which accounts for 22% of total imports. China's significant contribution stems from its vast paper manufacturing sector, supplying a range of products, including raw materials, that meet India's high demand in the paper and packaging industries. The United States is the second largest import partner with a 17% share, likely reflecting both India's demand for high-quality paper products and its reliance on diverse sources for specific grades and types of paper. Italy, with an 11% share, is the third key import partner, bringing in specialized and often premium-grade packaging materials and machinery. These partnerships highlight India's approach to diversifying its import sources to ensure a steady supply of paper products, raw materials, and technology required for its expanding domestic markets. This diversified import strategy not only strengthens supply chain resilience but also enables India to tap into innovative packaging solutions from advanced manufacturing economies.

### Regulatory Landscape

- Environmental Regulations:** The **Plastic Waste Management Rules** (2016, amended in 2021) have set forth stringent guidelines restricting single-use plastics in India. This policy directly impacts the disposable paper cup industry by encouraging a shift towards sustainable alternatives, such as paper-based products, to mitigate environmental impacts and reduce non-biodegradable waste in landfills. Additionally, **The Environment (Protection) Act** (1986) forms the legislative backbone for environmental oversight, mandating compliance with emission norms and waste management standards that influence the production and disposal of paper-based products.
- Forestry and Raw Material Sourcing Policies:** The **National Forest Policy** (1988) underscores the sustainable use of forestry resources, advocating for sustainable logging practices and preservation of natural habitats. This impacts paper manufacturing, as raw materials for paper cups are often sourced from wood pulp. Furthermore, recent government policies under **The Compensatory Afforestation Fund Act** (2016) mandate reforestation efforts, ensuring that raw material sourcing aligns with environmental preservation goals.

### Key Initiatives

**Waste Management and Circular Economy Promotion:** Swachh Bharat Abhiyan and the National Action Plan for Climate Change (NAPCC) support initiatives for waste segregation and recycling, indirectly benefiting paper cup manufacturers by fostering a circular economy. This framework reduces reliance on virgin materials and aligns with global sustainability goals, thus supporting a stable supply chain for recycled paper products.

- **India's National Conservation Council (NCCF) joined the PEFC alliance** in 2015 and, by 2019, secured PEFC endorsement for the nation's forest certification system. Since then, NCCF has actively worked to increase awareness of the benefits of purchasing and selling certified products and has promoted the sustainable public procurement of PEFC-certified products.
- **Financial Assistance:** The government offers indirect financial support through schemes under Startup India and Stand-Up India, which provide tax exemptions and subsidies to small and medium enterprises (SMEs). Hence, it is easy to start a manufacturing business in a potentially big and profitable market like paper cups.
- **Green Paper Initiative by the Confederation of Indian Industry (CII) - Paper Division:** This initiative is a partnership between CII and several paper manufacturers aimed at encouraging the use of recycled paper products. As a result of this initiative, there has been a notable rise in the accessibility and cost-effectiveness of eco-friendly paper products for both businesses and consumers.

### Threats & Challenges

The Indian cup stocks and food-grade papers industry faces several challenges that affect both production and market adoption. These challenges include sourcing raw materials, excessive water usage, technological requirements, cost considerations, and waste management issues. Below is an analysis of the primary challenges.

- **High Production Costs:** Manufacturing paper cup stocks and food-grade paper involves higher production costs compared to traditional alternatives like plastic cups. These costs stem from sourcing sustainable raw materials, advanced manufacturing processes, and compliance with quality standards.
- **Raw Material Sourcing and Price Volatility:** The production of paper stocks relies on paperboard, which is made from virgin wood pulp. Sourcing this material often involves sustainable forestry practices, which add to production costs. Softwoods like pine and spruce are valued for their strength, while hardwoods like eucalyptus offer superior print quality. Rising global demand for these raw materials, driven by competing industries like furniture and packaging, creates supply bottlenecks and price instability. Smaller manufacturers with limited bargaining power are particularly vulnerable to price fluctuations, leading to further strain on their profit margins.
- **Volatility in Material Costs and Sourcing Issues:** Softwoods like pine and spruce, known for their long fibers, provide strength and durability, making them ideal for paperboard. Eucalyptus, a hardwood, is also increasingly used due to its short fibers, which offer good print quality and a smooth surface finish. The blend of both softwood and hardwood allows for a balanced product that's strong and easy to print on. Any increase in the cost of wood pulp or paperboard significantly affects small and mid-sized paper cup manufacturers, who often lack bargaining power. For these companies, who primarily handle converting paperboard into cups rather than producing the board itself, price increases lead to reduced margins, making it challenging to absorb costs without passing them onto customers.
- The paper cup industry's reliance on consolidated suppliers for high-quality paperboard underscores the sector's sensitivity to price volatility in the pulp and paperboard markets. For these companies, who primarily handle converting paperboard into cups rather than producing the board itself, price increases lead to reduced margins, making it challenging to absorb costs without passing them onto customers. An increase in the cost of sourcing these materials—driven by competition from other sectors, such as the furniture industry—can strain profit margins for paper cup manufacturers. Many smaller firms have limited ability to absorb these costs and are often forced to pass them on to consumers, potentially impacting sales and market share.
- **Reliance on Large Suppliers:** A few large players, such as ITC, dominate the paperboard supply chain, leaving small and mid-sized manufacturers heavily dependent on them. This dependency limits manufacturers' negotiating ability and exposes them to supply chain disruptions.

- Water Utilization:** Paper cup manufacturing is resource-intensive, requiring significant amounts of water, which raises environmental concerns. Studies show that it takes approximately three lakh liters of water to make 60,000 cups. Similarly, to recycle these cups it takes around 26,000 litres of water. In a country like India, where water scarcity is a pressing issue in various regions, the high-water footprint of paper cup manufacturing becomes a significant drawback. This factor affects both the environmental appeal and the sustainability profile of paper cups, deterring environmentally conscious consumers and businesses.
- Durability and Limited Heat Resistance:** Although paper cups are regarded as an eco-friendly alternative, their heat resistance and durability are often inferior to plastic and foam options. This limitation affects their functionality for hot beverages and other applications where sturdier containers are needed. In high-demand settings such as events, outdoor catering, and fast-food outlets, the fragility of paper cups can hinder operational efficiency, leading to spillage, waste, and customer dissatisfaction.
- High Costs of Equipment and Technology:** The technology and equipment required for manufacturing paper cup blanks and Food Grade Papers tend to be more advanced and expensive than those for plastic cup production. Specialized machinery and coating techniques are needed to produce cups that are liquid-resistant and durable, especially when dealing with hot beverages. For manufacturers, this translates into higher capital expenditure and operational costs, which may not be feasible in markets with limited budgets. In a price-sensitive market like India, where affordability is paramount, these high production costs often make it challenging to compete with plastic cups, which are cheaper to produce.

Cost Breakdown & Other Requirements	
<b>Equipment</b>	The cost for an automatic paper cut manufacturing machine is Rs.8,50,000/- and dyes would be required with a cost of Rs.1,50,000.
<b>Raw Materials</b>	The total investment in raw material per month would be over Rs. 6 lakhs
<b>Land &amp; Building</b>	An area of about 500 square metres, at least with an electricity connection
<b>Labour Requirement</b>	Approximately Rs. 5 Lakhs a month
<b>Total cost of production including Bank loans, land, securing licences, other machine requirements like 3D printing, etc, could go over Rs. 70 Lakhs to 1.5 Cr.</b>	

- Waste Management and Recycling Challenge:** While paper cup blanks and Food-Grade Papers are theoretically biodegradable, improper disposal and inadequate waste segregation often lead to them ending up in landfills, negating their environmental benefits. Many paper cups are coated with a thin plastic layer for insulation, making them difficult to recycle without specialized processes that are not widely available in India. This adds to the waste management challenges and creates a gap between the industry's sustainability objectives and the actual environmental impact of paper cups.

## Competitive Landscape

### Nature of Industry

The paper cup stock and food-grade paper industry provide semi-finished disposable cups to disposable cups manufacturers. The industry in India is part of the broader sustainable packaging sector, which is proliferating due to increasing environmental concerns and regulatory shifts away from single-use plastics. This industry is primarily characterized by a fragmented market structure, with numerous small to medium-sized manufacturers alongside a few large players. These manufacturers cater to diverse sectors, including hotels, restaurants, and brand outlets & franchisee. Some companies in this industry manufacturing paper stocks & food grade paper and supplying that to cup manufacturers and few are directly providing cups to the particular clients on demand, this differentiation in the industry creating a more complex landscape and increasing the competition.

The industry relies heavily on raw materials and the supply chain for these materials is increasingly oriented toward sustainable sourcing, with a preference for recycled or sustainably managed sources. Manufacturing is generally centralized around industrial hubs, with key states like Maharashtra, Tamil Nadu, and Gujarat being production centres. This industry is also influenced by seasonal demand, peaking during festivals, weddings, and holiday seasons, where the use of disposable cups rises in tandem with increased consumption of on-the-go beverages and foods. The demand of cups directly fuels the demand of paperboard & paper cup blank for making bulk of cups for different companies.

As an emerging market, the Indian paper blank and food grade paper industry is dynamic, with ongoing developments in technology, sustainability practices, and innovation in product design. Companies are increasingly investing in R&D to create products that balance cost-effectiveness with eco-friendliness, ensuring compliance with India's environmental regulations while meeting consumer expectations.

### Analysis of Factors Shaping Competition

Several key factors shape competition within India's paper cup stocks and food grade paper market:

- **Regulatory Environment:** Stringent government regulations on single-use plastics have pushed businesses to switch to paper disposables. This regulatory environment benefits compliant manufacturers while increasing entry barriers for those unable to meet eco-friendly standards. Companies that can consistently adhere to environmental norms hold a competitive advantage.
- **Raw Material Sourcing and Cost Efficiency:** The cost and availability of quality raw materials for making food grade paperboard and paper cup stocks directly impact production costs. Companies that have secure, cost-effective supply chains, or can utilize recycled materials without compromising quality, can produce at lower costs and capture market share by offering competitive pricing.
- **Presence of Alternative:** Companies in food and beverages are demanding disposable cups, and numerous players in the sector are providing printed disposable cups directly to the client rather than providing paper cup blanks (a pre-formed cup). In addition to this factor, the rise of reusable containers and other sustainable alternatives has recently threatened disposable cup manufacturers.
- **Innovation and Product Differentiation:** Companies that innovate with new designs, coatings, and branding opportunities for cups can attract a wider range of clients, particularly in sectors like hospitality and event management. Differentiation through unique designs, customization options, and eco-certifications helps companies stand out in a competitive market.
- **Brand Reputation and Client Relationships:** It is crucial to build strong relationships with major clients such as disposable cup manufacturers and other end-user industries like food chains, airlines, and hotels. Companies with established reputations for quality, reliability, and sustainable practices have a competitive edge, as they are often the preferred suppliers for large, recurring orders.
- **Economies of Scale:** Larger players benefit from economies of scale in both production and distribution, allowing them to offer more competitive pricing. Smaller manufacturers often face challenges in scaling up and must compete through niche offerings or regional focus.
- **Technological Advancements in Manufacturing:** The adoption of advanced manufacturing techniques, such as automated production lines, enables companies to improve efficiency and quality. Companies that invest in such technology are likely to have lower production costs and higher throughput, strengthening their competitive position.
- **Consumer Demand for Eco-Friendly Products:** Increasing consumer preference for sustainable and biodegradable products drives competition, as companies strive to position themselves as eco-friendly brands. Those that invest in green certifications and sustainable sourcing often enjoy enhanced brand loyalty and a broader consumer base.

### Growth Forecast

The paper cup stock industry is experiencing growth on the back of the Indian disposable paper cups and glasses sector which currently stands at approximately 20-23 billion units during FY2024, with projections indicating growth to 28-30 billion units by FY2032. This represents a robust compound annual growth rate (CAGR) of 3 – 4 %. This growth is primarily fuelled by increasing consumer awareness regarding the environmental consequences of plastic disposables and a rising demand for sustainable, eco-friendly alternatives.

Sources:<sup>5</sup> Dun & Bradstreet Insight Based on Syndicated Research Report

Several key sectors are driving this market expansion, notably the rapidly evolving food and beverage (F&B) industry, along with the proliferation of cafes, restaurants, and food delivery services. These sectors are not only catering to consumer preferences for convenience and hygiene but are also generating significant employment opportunities throughout the supply chain, from manufacturing to retail. Government policies aimed at promoting sustainable practices—particularly the ban on single-use plastics—have significantly accelerated demand for disposable paper products. These regulations have led to a shift towards eco-friendly alternatives, reinforcing the market's growth while also contributing positively to environmental preservation. The organized retail sector plays a crucial role in this expansion, improving product availability in supermarkets and hypermarkets, thus enhancing consumer access to sustainable options.

Additionally, the on-the-go and takeaway culture, along with rising disposable incomes, has intensified interest in custom-designed paper cups, allowing businesses to cater to diverse consumer preferences. Technological advancements in paper cup manufacturing, including enhanced design and printing capabilities, have further supported this trend. The availability of high-quality raw materials such as paper and food-grade coatings are essential for producing reliable and aesthetically pleasing products. Furthermore, the growth of organized waste management and recycling facilities, particularly in urban and semi-urban areas, is addressing the increased consumer demand for sustainable, convenient, and hygienic disposable solutions. This ecosystem fosters environmental sustainability and contributes to job creation, supporting local economies and promoting a circular economy where recycled materials are reintegrated into the production process.

## MANUFACTURING PROCESS

When it comes to producing quality paper products, it is crucial to ensure effectivity and efficiency at each step. The production process of our products has been elaborated hereunder:

### 1. Sourcing of Materials

We source quality materials from trusted authorised dealer of suppliers. These materials primarily includes paper cub board, craft papers, granules for PE, PLA and Barrier coatings, ink and food grade chemicals ensuring our products meet environmental standards.

### 2. Preparation

At this particular stage after sourcing the materials, manufacturing process is put into motion. After sourcing, materials undergo essential checks like GSM, size, and quality to ensure they meet our production standards, preparing them for the next stages of manufacturing.

### 3. Coating

In this stage, a **coating machine** applies precise heat and pressure, transforming the paper stock into paper cups or packaging products, ensuring durability and functionality.

### 4. Slitting

A **slitter machine** cuts large rolls of raw material into narrower sizes, optimizing the material for further processing. It begins by taking a large roll of raw material known as a master roll and running it through the slitter.

### 5. Printing

In the printing stage, flexographic printing technology is used to transfer quality ink onto the substrate (paper).

- **Ink Chamber and Doctor Blade System:** Ink is pumped into the chamber, where the doctor blade system controls the ink distribution. The anilox roller collects ink in its engraved cells and transfers it to the printing plates mounted on the plate cylinder.

- **Plate and Impression Cylinders:** The printing plates, once inked, press the image onto the substrate via the impression cylinder, which supports the paper during printing.
- **Inking System:** The system maintains a constant ink supply with an ink tank, pump, and return lines, ensuring optimal viscosity and smooth operation.

This process ensures precise printing with color fidelity and durability, essential for product branding and customer appeal.

## 6. **Punching**

A **punch press** creates specific hole patterns and shapes from the printed material, defining the required size and removing excess material efficiently.

## 7. **Material Sorting and Breaking**

This stage involves the breaking & shorting of paper product, such as ML size wise, colour wise (single colour, double colour & multi-colour) & remove wastage.

## 8. **Quality Control**

Our rigorous quality control system ensures that each product adheres to strict standards. From raw materials to the finished product, we follow standard operating procedures to maintain consistent quality and customer satisfaction.

## 9. **Dispatch**

Once the products are quality-checked, they are packaged and dispatched according to scheduled plans. We ensure timely and efficient distribution, adhering to customer requirements.

## **Utilities & Infrastructure Facilities**

### *Water*

The water requirement for each of our projects is met through sources located in the nearby local area and is generally arranged by government authorities or related bodies i.e. Dewas Water Projects Works Pvt. Ltd.

### *Power*

Our Manufacturing facility and registered office have adequate power supply position from the public supply utilities. For the Manufacturing facilities, we have connected load of Annual GMC: 1200 per KVA from M.P. Paschim Kshetra Vidyut Vitaran Co. Ltd. for our Unit established in Dewas, Madhya Pradesh.

### *Health, Safety and Environment*

We have obtained necessary consent & approvals from the Pollution Control Board for operating our Manufacturing facilities, under the Water Act, Air Act and authorization under Hazardous Management Rules. For further details, please refer to the chapter titled “Government and Other Statutory Approvals” beginning on page 247.

Further, we have installed the fire resistance equipments and additional water tanks for the safety of our manufacturing unit and human capital.

We have adopted safety procedures at our Manufacturing facility, particularly in relation to the production, handling, storage and transportation of materials. In addition, our staff are trained for safety at work and manuals for various activities. This includes knowledge about storage, handling and disposal of materials, which they handle. We have provided necessary personal protection equipment for the safety of our workers.

## Raw Materials and Sourcing

There are only a few paper manufacturing companies in India, and for the specific grade of paper we use, the options are even more limited. Additionally, these paper companies sell through distributors, each with a fixed quantity quota. Since, we have expanded over the past two years, our paper requirements have increased. As a result, we have started utilizing our group companies to procure paper from other manufacturers.

Further, there are no conflict of interest between the suppliers of raw materials and third-party service providers and the Company, Promoters, Promoter Group, Key Managerial Personnel, Directors and Group Entities & its directors except as disclosed.

\* These revenues are derived from export incentive programs, which include the Merchandise Exports from India Scheme (MEIS), Remission of Duties and Taxes on Exported Products (RoDTEP), and Export Incentive Claims.

The details of these schemes are as follows:

#### ***Merchandise Exports from India Scheme (MEIS):***

The MEIS program was introduced to promote the export of specified goods to global markets. Under this scheme, the Company earns a percentage of the Free on Board (FOB) value of exports as an incentive. This contributes significantly to our revenue, allowing us to price our products competitively in the international market and enhance profitability.

#### ***Remission of Duties and Taxes on Exported Products (RoDTEP):***

The RoDTEP scheme aims to reimburse exporters for embedded taxes and duties that are not refunded under other mechanisms, such as electricity duty, VAT on fuel used in transportation, and others. The incentives under RoDTEP provide crucial support to our export operations by offsetting these costs, thereby improving our financial performance and enabling sustainable export growth.

#### ***Export Incentive Claims:***

In addition to MEIS and RoDTEP, the company benefits from various export incentives provided by government authorities, including duty drawbacks and exemptions under specific export promotion schemes. These claims further enhance the revenue base and contribute to the company's efforts in expanding its global market presence.

*Note: The Company has discontinued the manufacturing of Paper Cups and Paper Cup Straw/ Lead from the F.Y 2023-24. However, the sale of these products continues solely to clear existing unsold inventory.*

## **OUR COMPETITIVE STRENGTHS**

Our Company possesses several competitive advantages that differentiate us from our peers and position us for long-term success in the Paper Industry:

- Advanced Technology Machineries:** We have made significant investments in our machineries, primarily procured from leading countries such as China and Germany, to ensure the quality and efficiency. What sets our machinery apart is that it is customized based on our own research and development efforts.

Our machinery enables a distinctive manufacturing process that allows us to apply coatings at an optimized temperature of 200°C to 300°C, resulting in a perfect fusion between the paper and coating. The key advantage of this process is that the coating bonds seamlessly with the paper, making it difficult to detect or separate the two. This innovation ensures the quality and durability of our products, setting us apart in a market where quality and performance are crucial.

Our in-house Research and Development (R&D) team headed by Mr. Sunil Maheshwari, Promoter & Managing Director of our Company plays a critical role in driving innovation and ensuring the continuous improvement of our products. By focusing on the development of new materials, coatings, and production techniques, we are able to offer customized solutions that meet the evolving needs of our customers.

Further, we can manufacture 30 GSM to 500 GSM biodegradable paper only on single machinery.

Further, for a detailed description about our plant and machinery please refer section titled as “Our Machineries” on page 141 and for risk associated with this kindly refer “Risk Factor - 11” in the chapter titled “Risk Factors” beginning on page 36.

- **Production Capabilities:** Our machinery also enables us to manufacture a wide range of paper products with grammage flexibility, from 30 GSM to 500 GSM, all on a single machine. This versatility is a major advantage, as it allows us to efficiently produce both lightweight and heavy-duty paper products without the need for multiple machines or production lines. This streamlined production process not only increases operational efficiency but also reduces costs, providing us with a competitive edge in terms of pricing and product availability.
- **Strategic Location of Manufacturing Units:** Our manufacturing units are strategically located in Dewas, Madhya Pradesh, which serves as a major road junction and is centrally positioned in India. This prime location provides us with easy access to raw materials and enables us to significantly reduce procurement costs. Additionally, being at the heart of the country allows us to take advantage of lower transportation costs and efficient logistics.

Madhya Pradesh is also a key soybean producer, ensuring a steady supply of essential raw materials for our paper products. The region’s well-connected railway and roadway infrastructure further helps in minimizing transportation expenses and avoiding product spillages during distribution. This not only lowers operational costs but also ensures timely delivery to high-demand markets across India.

Our strategic location offers significant economies of scale in both production and distribution, enabling us to serve both domestic and international markets efficiently. By optimizing logistics and supply chain processes, we are able to maintain a competitive edge in terms of cost-effectiveness and reliability.

- **In-house Designing Team:** Our Company possess an in-house designing team, which plays a crucial role in bringing creativity and innovation to our product offerings. The team is led by Ms. Saloni Maheshwari, a graphic designer and the daughter of our Managing Director, who is also a member of the promoter group. Ms. Maheshwari has completed a two-year graphic designing course from the Naba University in Milan, Italy, and brings international expertise and a fresh, creative perspective to our designs.

Additionally, we have embossing facilities, including UV (ultraviolet) embossing and foiling embossing. These embossing techniques enable us to create intricate patterns and designs on paper, giving our products a sophisticated finish that stands out in the marketplace.

- **Biodegradable and Environment Friendly Products:** We are committed to producing sustainable and eco-friendly products that not only meet the growing demand for environmentally responsible solutions but also prioritize consumer health. Our range of paper cup blanks are coated with PLA (Polylactic Acid) and Barrier coatings, both of which are fully biodegradable and environment friendly.

- **PLA Coatings:** Made from natural materials such as maize, potato, and corn granules, PLA is a plant-based alternative to traditional plastic coatings. Unlike conventional disposable cups, our PLA-coated products are non-toxic and pose no harm to human health.

- **Barrier Coatings:** Our Barrier coatings are made from food-grade natural chemicals, offering a safe and sustainable alternative to synthetic coatings. These coatings are designed to provide good resistance to moisture and grease while ensuring that the cups remain safe for food contact. Like PLA, they are also biodegradable, reducing the environmental impact typically associated with disposable packaging.

By utilizing these sustainable materials, we offer paper products that are free from harmful chemicals, ensuring that they are not only safer for consumers but also have a minimal ecological footprint. Our commitment to

biodegradable solutions aligns with global trends toward reducing single-use plastic waste and promoting a circular economy, helping to protect the environment while providing the products.

- Wide range of Product Portfolio:** We offer a diverse and comprehensive product portfolio to meet the varied needs of our customers. Our offerings include paper cup blanks (PE-coated, PLA-coated, and Barrier-coated), food-grade papers (greaseproof, wet strength, vegetable parchment, and more), and customized paper solutions. This wide range ensures that we can cater to various industries, including foodservice, retail, and packaging, tailored products for every requirement.
- Maximized Efficiency and Minimal Waste:** One of the key advantages of our advanced machinery is the exceptionally low wastage rate. This minimal wastage is a result of the well optimized production process, which allows us to maximize the use of each raw material input.

By achieving near-perfect utilization of our raw materials, we are able to significantly reduce production costs. This contributes to cost-effective pricing for our products and allows us to offer competitive rates while maintaining product quality.

- Direct Sales to Customers:** We sell our products directly to customers, eliminating the need for intermediaries, dealers, or distributors. This direct-to-customer model allows us to reduce additional costs, offering more competitive pricing and ultimately increasing profit margins. By cutting out middlemen, we can build stronger relationships with customers, ensuring better service and faster response times.

### 3. Presence in International Market

We have successfully exported our finished goods around 10 countries across the globe, primarily in gulf countries. We plan to continue our strategy of diversifying and expanding our presence in these regions for the growth of our business. We are selective in expanding to new locations and look at new geographies where we can deliver quality products without experiencing significant delays and interruptions. Through further diversification of our operations geographically, we hope to hedge against risks of operations in only specific areas and protection from fluctuations resulting from business concentration in limited geographical areas.

## **FISCAL YEAR ENDED MARCH 31, 2025 COMPARED WITH THE FISCAL YEAR ENDED MARCH 31, 2024**

### **Income**

The Company primarily earns its revenue from the sale of products, including Paper Cup Blanks, Paper Sheets, and Paper Reels. Other operating revenues consist of income from job work and other services. For the fiscal year ended March 31, 2025, the total revenue (including other income) was Rs. 11,595.63 lakhs.

Revenue from operations increased by Rs. 4,001.29 lakhs, or 54.77%, to Rs. 11,306.80 lakhs in Fiscal 2025, compared to Rs. 7,305.51 lakhs in Fiscal 2024. This significant growth was primarily driven by higher product demand. The sale volume increased from 9,621.55 MT in Fiscal 2024 to 12,626.35 MT in Fiscal 2025, reflecting a 31.23% increase. Additionally, our Company added new products in Fiscal 2025, such as Paper MTR /OTR and OGR Paper which contributed Rs. 285.18 lakhs and Rs. 427.75 lakhs or 2.51% and 3.76% respectively in the overall sales mix. In Fiscal 2024, revenue from operations had declined by Rs.823.59 lakhs compared to Fiscal 2023 due to a fire incident that disrupted business operations for approximately two months. As a result, only nominal sales were recorded during that period. The low revenue base in Fiscal 2024 also contributed to the higher year-on-year growth observed in Fiscal 2025.

Revenue from other operating income, which includes job work and income from other services, decreased by Rs. 25.62 lakhs, or 29.13%, to Rs. 62.35 lakhs in Fiscal 2025, compared to Rs. 87.98 lakhs in Fiscal 2024. This decrease was primarily due to a reduction in sales of ink and the remission of duties and taxes on exports.

Other income increased by Rs. 28.70 lakhs, or 14.51%, to Rs.226.48 lakhs in Fiscal 2025, compared to Rs. 197.78 lakhs in Fiscal 2024. The increase was primarily driven by a rise in the receipt of Udyog Capital Subsidy, which grew by Rs.72.32 lakhs, or 59.00%, to Rs.194.89 lakhs in Fiscal 2025 from Rs. 122.57 lakhs in Fiscal 2024. However, this increase was partially offset by the absence of income from rate differences on sales, which stood at nil in Fiscal 2025 compared to Rs.28.09 lakhs in Fiscal 2024, and the non-receipt of scrap claim related to fire-damaged materials, which was nil in Fiscal 2025 as against Rs.8.11 lakhs in Fiscal 2024.

### **Expenditure**

Our total expenses increased by Rs. 3,136.66 Lakhs or 45.00% to Rs. 10,106.52 lakhs for Fiscal 2025 compared to Rs. 6,969.86 lakhs for Fiscal 2024. This was primarily attributable to:

#### **Cost of Materials consumed**

Our cost of materials consumed increased by Rs. 3,560.98 lakhs or 57.26% to Rs. 9,779.80 lakhs for Fiscal 2025 compared to Rs. 6,218.82 lakhs for Fiscal 2024. The increase in Cost of Material Consumed is mainly due to higher consumption driven by increase in production and revenue from operations.

#### **Change in inventories of finished goods and work-in-progress**

Change in inventory of finished good stood at Rs. (681.18) lakhs in Fiscal 2025 as compared Rs. 126.11 lakhs in Fiscal 2024.

#### **Employee Benefit Expenses**

Our employee benefits expense increased by Rs. 61.35 Lakhs or 57.99% to Rs. 167.15 lakhs for Fiscal 2025 from Rs. 105.80 lakhs for Fiscal 2024. The increase is primary due to the increase in salary and wages by Rs. 39.32 Lakhs or 87.64% to Rs. 84.19 lakhs in Fiscal 2025 from Rs. 44.87 lakhs in Fiscal 2024 and increase in the Director Remuneration by Rs. 20.00 Lakhs or 37.04% to Rs. 74.00 lakhs in Fiscal 2025 from Rs. 54.00 lakhs in Fiscal 2024.

### **Finance Costs**

Our finance costs increased by Rs. 109.05 Lakhs or 60.77% to Rs. 288.50 lakhs for Fiscal 2025 compared to Rs. 179.45 lakhs for Fiscal 2024. This increase was primarily due to the increase in the long term and short-term borrowing during the year. The increase in the short-term borrowing is primarily to fund the working capital requirement of the Company which rose due to increase in the revenue from operations. However, the short-term borrowing decreased to Rs. 2,799.88 lakhs as at the end of Fiscal 2025 from Rs. 3,073.70 lakhs as at the end of Fiscal 2024 and long-term borrowing decreased to Rs. 1,166.20 lakhs as at the end of Fiscal 2025 from Rs. 1,446.15 lakhs due to the repayment of borrowing at the end of the Fiscal 2025.

### **Depreciation & Amortization Expenses**

Depreciation and amortisation expense increased by Rs. 107.01 lakhs, or 77.05%, to Rs. 245.90 lakhs in Fiscal 2025, compared to Rs. 138.89 lakhs in Fiscal 2024. The increase was primarily due to the addition of Plant and Machinery and Factory Building amounting to Rs. 1,931.25 lakhs and Rs. 230.54 lakhs, respectively in Fiscal 2024. These assets were capitalised in the later part of Fiscal 2024, resulting in only partial depreciation being charged during that year. However, in Fiscal 2025, depreciation on these additions was charged for the entire year, leading to a higher depreciation and amortisation expense.

### **Other Expenses**

Our other expenses increased by Rs. 105.56 lakhs or 52.57% to Rs. 306.35 lakhs for Fiscal 2025 as compared to Rs. 200.79 lakhs for Fiscal 2024. ### **Tax Expenses**

Our tax expenses increased by Rs. 238.91 Lakhs or 107.23% to Rs. 461.72 lakhs for Fiscal 2025 as compared to Rs. 222.81 lakhs for Fiscal 2024. The increase in current tax was primarily on account of increase in taxable income for Fiscal 2025.

- The profit margin increased to 9.04% in Fiscal 2025 as compared to 5.39% in Fiscal 2024. This improvement in margins is primarily attributable to a higher proportion of high-margin products in the sales mix. During Fiscal 2025, the Company introduced two high-margin products, Paper MTR/OTR and OGR Paper, which contributed 2.51% and 3.76% respectively to the overall sales mix.
- Total expenses to revenue from operation was 88.89% in Fiscal 2025 compared to 94.27% in Fiscal 2024.

### Phased implementation of Unified Payments Interface

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of, among others, equity shares. Pursuant to the SEBI UPI Circulars, UPI has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for Bids by UPI Bidders through designated intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment Mechanism, the SEBI UPI Circular have introduced the UPI Mechanism in three phases in the following manner:

- **Phase I:** This phase was applicable from January 01, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Individual Bidder had the option to submit the ASBA Form with any of the designated intermediaries and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continue to be six Working Days.
- **Phase II:** This phase has become applicable from July 01, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019, had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020, decided to continue Phase II of UPI with ASBA until implementation of UPI Phase III.
- **Phase III:** This phase has become applicable on a voluntary basis for all issues opening on or after September 01, 2023 and on a mandatory basis for all issues opening on or after December 01, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 09, 2023 ("T+3 Notification"). In this phase, the time duration from public issue closure to listing has been reduced from Six working days to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI. This Issue will be made under UPI Phase III of the UPI Circular.

Pursuant to the SEBI UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the SEBI UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked not later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the

relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints in this regard, the relevant SCSB as well as the post – issue BRLM will be required to compensate the concerned investor.

All SCSBs issuing the facility of making applications in public issues shall also provide the facility to make application using UPI. Our Company will be required to appoint one of the SCSBs as a Sponsor Bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and/ or payment instructions of the UPI Bidders using the UPI Mechanism.

The processing fees for applications made by UPI Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks make an application as prescribed in Annexure I of SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022 and provide a written confirmation on compliance with SEBI circular no. ### Illustration of the Book Building and Price Discovery Process:

Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of Rs. 20 to Rs. 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (Rs.)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%

1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., Rs. 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below Rs. 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

## RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Foreign investment is allowed up to 100% under automatic route in our Company.

The RBI and the concerned ministries/ departments are responsible for granting approval for foreign investment. The Government has from time to time made policy pronouncements on foreign direct investment (“FDI”) through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (earlier known as the Department of Industrial Policy and Promotion) (“DPIIT”), issued the FDI Policy, which, with effect from October 15, 2020 consolidated, subsumed and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. The FDI Policy will be valid until the DPIIT issues an updated circular. FDI in companies engaged in sectors/ activities which are not listed in the FDI Policy is permitted up to 100% of the paid-up share capital of such company under the automatic route, subject to compliance with certain prescribed conditions. As the FDI Policy does not specifically mention the Paper Industry, foreign investment in this industry is permitted up to 100% under the automatic route, in accordance with the general provisions applicable to sectors not specifically restricted or regulated.

Under the current FDI Policy and the FEMA Non-Debt Rules, foreign direct investment is not permitted in companies engaged in (a) multi-brand retail trading, undertaking retail trading by means of e-commerce, and (b) inventory-based model of e-commerce. In accordance with the FEMA Non-debt Rules, participation by non-residents in the Issue is restricted to participation by (i) FPIs under Schedule II of the FEMA Non-debt Rules, subject to limit of the individual holding of an FPI below 10% of the post-Issue paid-up capital of our Company and the aggregate limit for FPI investment currently not exceeding the sectoral cap i.e. 51% of the post issue paid up share capital; and (ii) Eligible NRIs applying only on a non-repatriation basis under Schedule IV of the FEMA Non-debt Rules. Further, other non-residents applying on a repatriation basis, FVCIs and multilateral and bilateral development financial institutions are not permitted to participate in the Issue. As per the existing policy of the Government of India, OCBs cannot participate in this issue. For details, please refer to the chapter titled “*Issue Procedure*” beginning on page 281.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (DIPP), issued consolidated FDI Policy, which with effect from August 28, 2017 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 27, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares by an Indian resident to a Non-Resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI/RBI.

The foreign investment in our Company is governed by, inter-alia, the FEMA, the FEMA Non-debt Rules, the FDI Policy issued and amended by way of press notes.

Further, in terms of the FEMA Non-debt Rules, the aggregate FPI investment limit is the sectoral cap applicable to Indian company as prescribed in the FEMA Non-Debt Instruments Rules with respect to its paid-up equity capital on a fully diluted basis. For details, please refer to the chapter titled “*Issue Procedure*” beginning on page 281.

Further, in accordance with the FDI Policy, the Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the FEMA Non-debt Rules, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the FDI Policy and the FEMA Non-debt Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Non-Debt Rules. Each Bidder should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar in writing about such approval along with a copy thereof within the Bid/ Issue Period.
